Miracle hai, to assan hai !!!

Whenever we hear the word "Accounting Software," we automatically think of Miracle. This brand is well-known in the industry by its tagline, *" Miracle Hai, to Assan Hai…!"*

With the vision of providing "Easy, Advanced & Quality Solutions" to their customers, RKIT Software Pvt Ltd was founded in 1998. With more than 75000+ happy customers, they have earned a place in India's top 10 accounting software providers.

Their mission is not only to provide Accounting Software to their customers but also to provide the best Business Solutions as well. The company has reached this milestone by continually evaluating feedback and implementing the requirements of its enormous number of clients, accountants, CAs, tax practitioners, and business professionals.

The Company every year arranges dealer meet and motivates their partners with rewards. In this dealer, the meet company presents the previous year's activities and upcoming year's planning.

On March 4th, 2023, RKIT Software Pvt Ltd Organized Dealer Meet 2023. This event was primarily focused on clearing up the road map for the upcoming years and explaining the market situation. Additionally, we recognized our top-performing dealers for their achievements over the past year. Our dealers' hard work and dedication have made us proud, and we look forward to celebrating their

As part of this dealer meeting, the company introduced Miracle 7.0, which comes with a lot of new features that are helpful to customers in everyday business. The application also allows users to add/update their accounts using GSTIN Search, find out the customer's GST filing date, and auto-downloading GSTR 2A/2B, etc. In addition, the company is ready for upcoming government initiatives in changes like the mandatory accounting audit trail feature.

A number of marketing strategies have already been implemented at the company level, and future marketing plans are being developed. Also, the company has partnered with third parties to boost digital marketing efforts and restructured its SEO base strategy.

Several marketing activities have already been undertaken at the company level, and future marketing strategies are planned. Furthermore.
One of the company's directors Director Mr. Dhimant Patel gives a presentation on how to grow in this situation they also told the cloud business take is a new opportunity not a take as a replacement product for a desktop. They explain how big the opportunity is for desktop business and how to prepare for an opportunity and what kind of knowledge is required to grab this new opportunity.

After that presentation, Mr. Digant Vora who is another director of this company give a brief speech on upcoming cloud products before starting the speech they show some beautiful glimpses of Cloud Products and which platform was used to develop these products, and what his main thought when they started to develop these products. They also add one important thing during this speech he was told that they always keep in mind that cloud products develop as the Easiest and most advanced.

They also add the most crucial point in the speech that in cloud product service scenario will totally change to provide cloud service dealers have to learn a lot of new things like coding, languages, script, etc. to learn these new things company will help dealers.
The company will arrange webinars for understanding cloud technologies and help the dealer to understand the whole service scenario in cloud products.

They also told that in cloud products no limitations all windows are open customers can integrate with other products through API. Customers easily bring data from other software without any huddle at work. even though the software can run in multiple locations with multiple users. They can also set user-wise security. After the cloud launches its very bright future for the company and its dealers, they have a lot of new opportunities that will open no limits in the cloud.

At the end of the dealer meeting company always appreciates their partner for their best effort, work, and contributions. So, at the end of the session company announces different awards to its partner like Best Debut, Best Target Achievement, Best Service & Subscription, Year of the Award, etc. really this is too many boosting activities for dealers also company arranges various games for the team bonding activities and pass on a message through this activities “One Team One Vision” is our motto and company always work as a team without the team we can't achieve our goal.

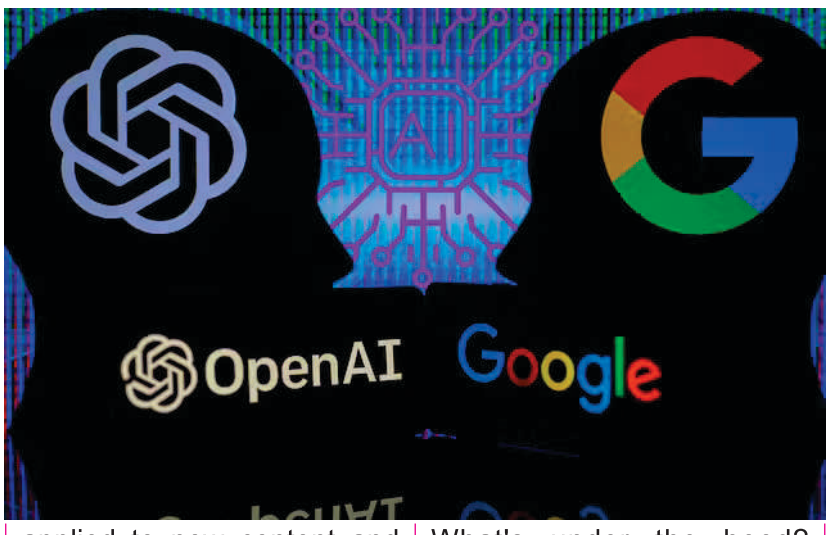
GOOGLE AND MICROSOFT ARE BRINGING AI TO WORD, EXCEL, GMAIL AND MORE



Google and Microsoft are on a mission to remove the drudgery from computing, by bringing next-generation AI tools as add-ons to existing services.

On March 16, Microsoft announced an AI-powered system called Copilot will soon be introduced to its 365 suite apps including Word, Excel, PowerPoint, Outlook, and Teams.

The news came about two days after Google published a blog explaining its plans to embed AI into its Workspace apps such as Docs, Sheets, Slides, Meet and Chat.

Collectively, millions of people use these apps each day. Bolstering them with AI could provide a major productivity boost – as long as security isn't an afterthought.

The advent of generative AI Until recently AI was mainly used for categorisation and identification tasks, such as recognising a number plate using a traffic camera.

Generative AI allows users to create new content, by applying deep-learning algorithms to big data. ChatGPT and DALL-E, among others, have already taken the world by storm.

Now, Microsoft and Google have found a more concrete way to bring generative AI into our offices and classrooms.

Like other generative AI tools, Copilot and Workspace AI are built on large language models (LLM) trained on massive amounts of data. Through this training, the systems have “learned” many rules and patterns that can be applied to new content and contexts.

Microsoft's Copilot is being trialled with just 20 customers, with details about availability and pricing to be released “in the coming months”.

Copilot will be integrated across apps to help expedite tedious or repetitive tasks. For example, it will: 1. help users write, edit and summarise Word documents 2. turn ideas or summaries into full PowerPoint presentations 3. identify data trends in Excel and quickly create visualisations 4. “synthesise and manage” your Outlook inbox 5. provide real-time summaries of Teams meetings 6. bring together data from across documents, presentations, email, calendar, 7. notes and contacts to help write emails and summarise chats.

Assuming it executes these tasks effectively, Copilot will be a massive upgrade from Microsoft's original Office Assistant, Clippy.

Google's Workspace AI will offer similar capabilities for paying subscribers.

What's under the hood? Microsoft described Copilot as "a sophisticated processing and orchestration engine working behind the scenes to combine the power of LLMs, including GPT-4 [...]." We don't know specifically which data GPT-4 itself was trained on, just that it was a lot of data taken from the internet and licensed, according to OpenAI.

Google's Workspace AI is built on PaLM (Pathways Language Model), which was trained on a combination of books, Wikipedia articles, news articles, source codes, filtered webpages, and social media conversations.

Both systems are integrated into existing cloud infrastructure. This means all the data they are applied to will already be online and stored in company servers.

The tools will need full access to the relevant content in order to provide contextualised responses. For instance, Copilot can't distil a 16-page Word document into one page of bullet points without first analysing the text.

This raises the question: will users' information be used to train the underlying models? In relation to this point, Microsoft has said, "Copilot's large language models are not trained on customer content or on individual prompts." Google has said: [...] private data is kept private, and not used in the broader foundation model training corpus.

These statements suggest the 16-page document itself won't be used to train the algorithms. Rather, Copilot and Workspace AI will process the data in real-time.

Given the rush to develop such AI tools, there may be temptation to train such tools on “real” customer-specific data in the future. For now, however, it seems this is being explicitly excluded.

Usability concerns As many people noted following ChatGPT's release, text-based generative AI tools are prone to algorithmic bias. These concerns will extend to the new tools from Google and Microsoft.

The outputs of generative AI tools can be riddled with inaccuracies and prejudice. Microsoft's own Bing chatbot, which also runs on GPT-4, came under fire earlier this year for making outrageous claims.

Bias occurs when large volumes of data are processed without appropriate selection or understanding of the training data, and without proper oversight of training processes.

For example, much of the content online is written in English – which is likely the main language spoken by the (mostly white and male) people developing AI tools. This underlying bias can influence the writing style and language constructs understood by, and subsequently replicated by, AI-driven systems.

For now, it's hard to say exactly how issues of bias might present in Copilot or Workspace AI. As one example, the systems may simply not work as effectively for people in non-English-speaking countries, or with diverse styles of English.

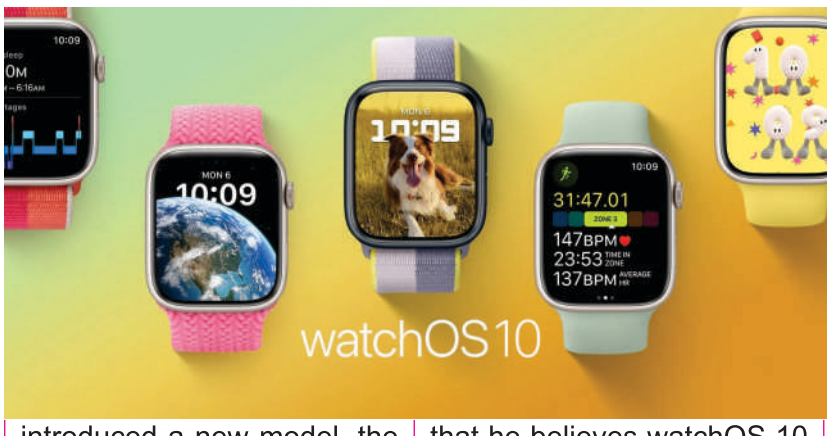
Security concerns One major vulnerability in Microsoft's and Google's AI tools is they could make it much easier for cybercriminals to bleed victims dry.

Whereas before a criminal may have needed to trawl through hundreds of files or emails to find specific data, they can now use AI-assisted features to quickly collate and extract what they need.

Also, since there's so far no indication of offline versions being made available, anyone wanting to use these systems will have to upload the relevant content online. Data uploaded online are at greater risk of being breached than data stored only on your computer or phone.

Finally, from a privacy perspective, it's not particularly inspiring to see yet more avenues through which the biggest corporations in the world can collect and synthesise our data.

APPLE WATCH OS 10 EXPECTED TO BE “FAIRLY EXTENSIVE UPGRADE”



With Apple's WWDC 2023 now official, we're beginning to get an inkling of what to expect on the software side across Apple's platforms. The latest tip comes from none other than Mark Gurman, who believes that watchOS 10 should be getting a fairly extensive upgrade this year with notable changes to the user interface. Details are still scarce on what these changes might actually be, but we're sure we'll be getting more leaks over the next two months leading up to WWDC.

Gurman also goes on to state that we might not see any major hardware changes this year, considering Apple introduced a new model, the Apple Watch Ultra, just last year. However, big hardware changes are expected to come in 2024 where Apple might shift to a larger, custom-built display for its watches.

In a tweet, Gurman (@markgurman) expressed that he believes watchOS 10 might have much more notable changes as compared to what's expected from iOS 17. watchOS 9 introduced a bunch of design changes and new features such as low-power mode, and continues to receive feature updates with subsequent iterations. It'll be interesting to see what sort of big interface changes Apple is planning for watchOS 10.

Some expected changes could probably be new watch faces, workout modes, more native watch apps, etc. While we might not hear about new watch hardware at WWDC, some of the new features that Apple will talk about could point to what we could expect on the hardware side of things, come September. Gurman does mention in his tweet though that we probably won't see any major hardware changes this year for the Apple Watch, as those are expected to happen in 2024. Earlier rumours suggested that Apple might skip the Watch Series 9 naming scheme and jump directly to Watch Series X, just like it did with the iPhone.

This year, WWDC 2023 will take place from June 5 to 9 at Apple Park in Cupertino, California. Apple is expected to announce iOS 17, iPadOS 17, macOS 14, watchOS 10, and tvOS 17 at the event. It is also expected to unveil its Reality Pro AR headset, although we probably won't see this in stores until much later as mass production is reportedly delayed to later Q3 2023.

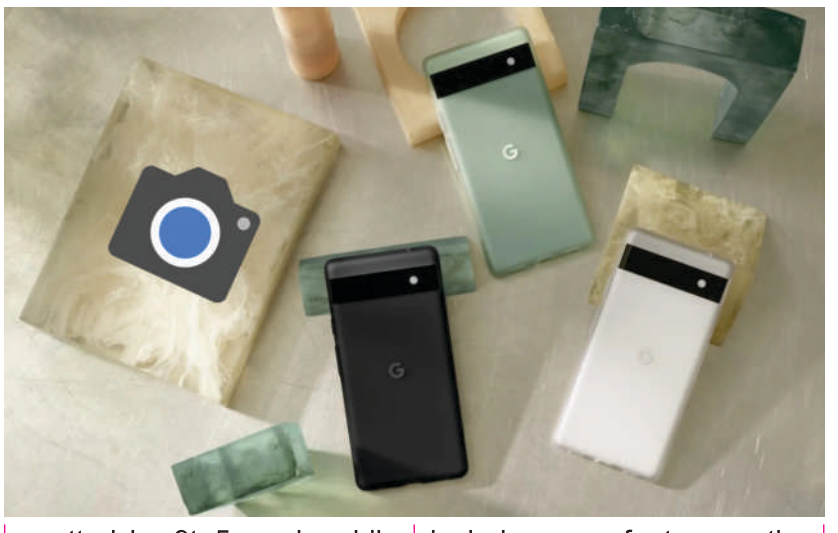
GOOGLE PIXEL 8 PRO MAY GET NEW NIGHT SIGHT FEATURE, SUGGESTS GOOGLE CAMERA 8.8 APK TEARDOWN



Google Pixel 8 series is expected to go official in May during the company's I/O 2023 event. The Pixel 7 successor is expected to debut with a complete camera overhaul and a recent APK (Android Package Kit) teardown of the latest Google Camera app adds more credibility to this rumour. Version 8.8 of the Google Camera app for Pixel smartphones reportedly points at a new photography feature on the upcoming Google Pixel 8. The alleged feature could blend multiple cameras to create more detailed Night Sight photos.

The development was first spotted by 9to5google while examining the Google Camera 8.8 app, a new version of Google's camera app for Pixel smartphones. As per the report, Google will include a new feature on the Pixel 8 Pro that would combine multiple cameras to take improved Night Sight photos. The APK teardown of version 8.8 of the Google Camera app for Pixel smartphones reportedly includes details of the Pixel 8 and Pixel 8 Pro and a reference to a "Multi-camera Super Res Zoom" feature. With the rumoured feature, both the main camera sensor and telephoto sensor will capture the same shot over an extended period and the Google Camera could merge them into a single Night Sight shot with more details.

Last year's Pixel 7 Pro also offered similar functionality. It takes photos with both the main and telephoto cameras and enhances the centre portion of the photos with details that wouldn't normally be visible.

Google is yet to confirm the development of the Pixel 8 series. Therefore, this information should be taken with a pinch of salt.

Google's I/O 2023 event will take place on May 10 and the company is expected to tease the Pixel 8 series during its annual conference. A new Tensor chip based on Samsung's Exynos 2300 SoC is expected to power the new handsets. The Pixel 8 Pro could feature a flat 6.52-inch display with a centre-aligned hole punch cutout for the selfie camera. It is said to measure 162.6 × 76.5 × 8.7mm as well.

NOKIA C12 PRO WITH ANDROID 12 (GO EDITION) LAUNCHED IN INDIA: PRICE, SPECIFICATIONS

Nokia C12 Pro, a budget-friendly smartphone, has been launched in India by HMD Global. This handset is available in two storage configurations and three colour options. The newly unveiled Nokia C12 Pro is powered by an octa-core chipset. The Nokia C12 was recently launched in India with a 6.3-inch HD+ display and an 8-megapixel rear camera. This budget-entry offering by HMD global is powered by an octa-core Unisoc 9863A1 chipset and comes with 2GB RAM and 64GB internal storage.

Nokia C12 Pro price in India

The Nokia C12 Pro is a low-cost smartphone that is available in India in two storage options. The lower-end model with 2GB of RAM and 64GB of internal storage is priced at Rs. 6,999. The variant with 3GB RAM variant with 64GB of internal storage is available for Rs. 7,499. Both variants of the smartphone support up to 2GB of virtual RAM. The device is available in three colours - light mint, charcoal, and dark cyan.

In comparison, the Nokia C12, also offered in similar colour variants, is priced at Rs. 5,999 for the single 2GB + 64GB storage variant.

Nokia C12 Pro specifications, features

Featuring a 6.3-inch IPS LCD with an HD+ resolution and a refresh rate of 60Hz, the dual SIM-supported Nokia C12 Pro smartphone is powered by an unnamed octa-core SoC. The phone boots Android 12 (Go Edition) out of the box and Nokia will provide two years of regular security patches and 12 months of replacement guarantee for the Nokia C12 Pro.

For optics, the Nokia C12 Pro sports an 8-megapixel rear camera along with an LED flash and a 5-megapixel front camera. HMD Global did not reveal any other specifications of the device.

The Nokia C12 with a 6.3-inch HD+ display with an aspect ratio of 20:9, has similar specifications to the Pro model, but is backed by an octa-core Unisoc 9863A1 chipset and packs a 3,000mAh removable battery that supports 5W wired charging.

INDIA'S DEBATED 1% TDS ON CRYPTO TRANSFERS ADDED MILLIONS TO GOVERNMENT TREASURY

The outcry from crypto traders and investors went unheard after Indian finance minister Nirmala Sitharaman failed to revise the controversial 1 percent TDS collection on each crypto transaction. In the last nine months, this TDS collection has said to have fetched over $19 million (roughly Rs. 157 crore) to the government treasury. The detail was disclosed to the Parliament recently by Pankaj Chaudhary, who is the Minister of State for Finance in the country. The data tracks ten months since the TDS law went live last July in India.

"Direct tax collected by way of tax deducted at source under section 1945 of the Income-tax Act, 1961, on payments made upon transfer of Virtual Digital Assets, aggregates to Rs. 157.9 crore upto 20/03/2023 for FY 2022-23," Chaudhary said in a written update to the Upper House.

Indians, last June, began to see one percent tax deductions on each crypto transaction. This essentially means that one percent TDS is being levied on every step around the purchase, trade, and deposit of crypto assets.

Not just on cryptocurrencies, this one percent TDS is also be charged on the transactions of other VDAs as well, such as non-fungible tokens (NFTs) and other metaverse elements.

Between June and November last year, the TDS collection from crypto transactions reportedly amounted to $7.4 million (roughly Rs. 60 crore), Chaudhary had informed at the time.

In the last five months, this amount has spiked by $11.6 million (roughly Rs. 95 crore) — indicating a rise in crypto transactions in India.

Time and again, members of India's crypto community have urged the finance ministry to revisit the 1 percent TDS and consider reducing it to promote the growth of the overall crypto sector. In a tweet, Sathvik Vishwakarma, the CEO of Unocoin crypto exchange reacted to Chaudhary's disclosure, calling the TDS rule a distraction in the growth of the digital assets industry in India.The government of India believes that by imposing one percent tax deducted at source (TDS) on each crypto transaction, it would be easier to keep a track of them despite the element of anonymity that crypto transactions entail.

The crypto community in India is set to surpass the US, UK, Russia, and Japan in terms of adoption this year. As per a recent report by Statista, India's crypto community is expected to envelop over 156 million users by the end of 2023.

Amid the expansion of the sector, the government of India, via its tax laws around crypto, is looking to curb any potential abuse of digital assets for illegal activities like money laundering and terror financing.

LAPCARE CONDUCTS MAJOR ROADSHOW IN TN & AP

MEGA DEALER CONVENTIONS HELD IN 5 KEY CITIES; PLANS ANNOUNCED FOR MAJOR EXPANSIONS IN SOUTH ZONE

IT Dealers of Trichy at the Lapcare Dealer Convention

IT Dealers from Madurai at the Lapcare Dealer Convention

Panel Discussion in Lapcare Coimbatore Event

Lapcare, a national ICT and CE brand, conducted multiple Mega Dealer Conventions last month, in Tamil Nadu and Andhra Pradesh. These series of events are part of Lapcare's Grand All India Roadshow campaign, designed with the aim of bonding with thousands of dealers, and members of the ICT fraternity, nationwide.

The current 1st Leg of the Roadshow was held in Coimbatore, Trichy, Madurai, VIjaywada and Guntur, in the second half of March 2023. Each event was attended by over 150 Dealers, coming from the host city, as well as from the wider district and surrounding districts. Lapcare's South India Roadshow was supported by all regional IT Dealer Associations, including -- CITA (Coimbatore IT Assoc), CAMS (Madurai Computer Dealers Assoc) and Dr. NTR IT Assoc in Vijaywada. State-wide Dealers belonging to the genres of IT Hardware, Consumer Electronics, Mobility and Network equipment, got a chance to see and experience Lapcare's wide, diverse and distinctive product range.

Lapcare is among the national leaders in multiple sectors, such as Laptop batteries, IT spares and peripherals. Following grand success and highly noteworthy Market penetration in the North and West Zones over the last 18 years, Lapcare had now made a strong foray into the lucrative Tamil Nadu and Andhra markets. In a live videocast from Delhi, Lapcare's MD, Atul Gupta, assured the ICT fraternity of TN about his Company's commitment to the state. He said, "Lapcare has strategically joined hands with multiple Distributors across the state, setup regional after-sales Service Centers, and also created a regional stock-hub. Our Sales, Marketing, Support and Logistics teams have dedicated manpower for the state. Our aim is to be the leading ICT Brand in the state within 2 years".

During a detailed presentation Lapcare's team showcased immense product variety, and underscored Lapcare's salient differentiators like India based R&D, India based QC practices, TQM (total quality management), and advanced logistics whereby TN retail points can replenish stock within 24 hours. The Lapcare team also gave attendees a peek into the medium-term future, where new sub-genres of products are expected to hit the market, starting from the upcoming quarter. These include trendy lifestyle based genres like Sports Neckbands, Smart Watches (Wearable Computers) and smart speakers. President of CAMS Madurai, Mr. Saravanan, and President of CITA Coimbatore, Mr. Gunaseelan, both praised the efforts of the Lapcare Roadshow, and for spreading product awareness among all IT Traders and retailers in their State.

Authorized Distributor Lap Solution strongly supported the event in Madurai, and Thenali Infotech buoyed the Trichy event. The Coimbatore event had a special format wherein a detailed panel discussion was held on contemporary business and economic issues, before the presentation began. The latter was strongly supported by the authorized distributor in Coimbatore, Laptop World.

Madurai based IT Businessman Ganpath Solanki, who heads M/S Lap Solution remarked, "Quality has been the hallmark of Lapcare's identity for years. Over the years I have faced a negligible number of complaints, because the products themselves are impeccable". Lapcare is among an elite list of Brands who conduct R&D activities in India, and have an extensive Total quality management (TQM) process.

Lapcare's large speakers (Twin Tower, Single Tower and Trolley) were kept on display and were stars of the show, much lauded by visitors. In a region that loves Cinema and Music, these products are public favorites. Awards were conferred to the Best Performers of 2022-23. This motivated those who missed out, to try harder in future, especially because Lapcare prides itself as being "the quintessential Dealer's Brand". New special offers were announced. Gala dinner and live entertainment followed.

Mr. Saravanan of Thenali Info Technology, Lapcare's Trichy Distributor, said "Lapcare is now the preferred brand for our regional dealer community, poised to go even higher in the next financial year; the national logistics team is very efficient and Channel partners receive goods promptly".

In early May, the Lapcare roadshow will recommence, this time there will be stops in Kerala, Karnataka, Goa and Maharashtra. The roadshow has received considerable media attention; all popular media in Tamil Nadu state have published the story.

MILAP 2023 WAS ORGANIZED BY SURAT COMPUTER ASSOCIATION

Unity For Solution ITRA

A beautiful Family Sneha Milan (Milap 2023) was organized by Surat Computer Association in the month of March.

In which every member of Surat Computer Association, sales person of every IT and CCTV company of Surat and Gujarat were invited along with their families.

FITAG Secretary Mr. Urenbhai Patel and Mr. Jaiminbhai from Central Zone were also present And Udaybhai Bhojani, Owner of PC Today Magazine also present in this event.

A beautiful product display and live demonstration was arranged by the sponsor's company for the knowledge update of the Surat Computer Association members in Milap 2023.

Different games for children and mehndi for ladies were also organized in this Milap 2023.

Then in the program of Surat Computer Association, the members were updated by President Yogeshbhai Korat, Vice President Pratikbhai Mordia and Satishbhai. And also past president Alokbhai Ghelani presented an activity report of the last 2 years and a project report of next year of Surat Computer Association.

After that, people also enjoyed dancing to the tune of a live orchestra and Gujarati Garba.

A lot of hard work was done by every Sponsors and the whole committee of Surat Computer Association to make this program successful.

ફેસબુકનો ઉપયોગ કરવાની ટોપ સેવન ટીપ્સ

અત્યાધુનિક ટેકનોલોજીના યુગમાં વેબસાઈટના વપરાશકર્તાઓ જાત જાતની સાઈટ્સ પર સર્ચ કરતા હોય છે. તેમાં યાહૂ, ટ્વિટર ફેસબુક વગેરેનો ઉપયોગ વધુ પ્રમાણમાં થાય છે. યુવાઓ ફેસબુક પર મિત્રોનું ગ્રૂપ બનાવે છે. પણ શું તમે જાણો છો કે ફેસબુક પર તમે તમારા નામ સાથે ઉચ્ચારની બાબતે માર્ગદર્શક ગાઈડ પણ ઉમેરી શકો છો? ધારો કે ફેસબુક પરના કોઈની સાથે સંબંધની ઈતિશ્રી કરવી હોય એ પણ બીજાને જણાવ્યા વગર તો શું કરશો ? આ માટે ઘણી ટ્રિક્સ અને ટિપ્સ છે. ફેસબુક સેવા સતત અપડેટ કરવામાં આવતી હોય છે. તેમાં જૂનાં ફીચર્સને દૂર કરીને નવાં ઉમેરવામાં આવતા હોય છે. આ બધી પ્રક્રિયામાં જો તમે મિત્રો પાસેથી અપડેટ મેળવવા આખો દિવસ સ્ક્રોલિંગ કરતા રહેતા હો તો ક્રેક્સ કરતી વખતે તમારી જાણ બહાર ઘણી બધી માહિતી સરકી જતી હોય છે.

ફેસબુકનો ઉપયોગ કરવાની રીત તમે એ કેવી રીતે કહેશો, કરશો

ફેસબુકનો ઉપયોગ કરતા ૮૩ ટકાથી વધુ અમેરિકા અને કેનેડાની બહારના દેશોના છે. તેઓ મિત્રો અને પરિવારના સભ્યો સાથે ચેટિંગ કરવા ૮૦થી વધુ ભાષાનો ઉપયોગ કરતા હોય છે. નામનો ઉચ્ચાર જણાવવાની ઘણી રીત છે. દા.ત. તમારા નામનો ઉચ્ચાર ઉમેરવો હોય તો ફેસબુક પર તમારા પ્રોફાઈલ સેકશનમાં જઈને તમારી વિગતો ક્લિક કરી શકો. તમારું નામ એના ઉચ્ચાર વિશે જણાવી શકો. ફેસબુક પર તમારું નામ અને અટકના ઉચ્ચાર વિશે સૂચનો કરી શકે. આ બધું કરવું ન હોય તો તમે તમારું પોતાનું ફોનેટિક પ્રોનાઉન્સર ટાઈપ કરી શકો.

વન ટાઈમ પાસવર્ડ

જો તમે સાઈબર કેફેના કમ્પ્યુટર પરથી લૉગ–ઈન કરતા હો અને તમને એમ લાગે કે તમારે તમારો કાયમનો પાસવર્ડ શેર નથી કરવો તો ફેસબુક તમને માત્ર એકવાર પાસવર્ડનો ઉપયોગ કરવાની સગવડ આપી શકે છે તે આઠ આંકડાનો પાસ વર્ડ મળી જાય પછી તેનો માત્ર ૨૦ મિનિટ સુધી ઉપયોગ કરી શકો એનો ફરીવાર ઉપયોગ નહી થઈ શકે.

પરફેક્ટ પિક્ચર

ફેસબુક પર નીતનવા ફીચર ઉમેરાતા જાય છે. ટેક્સ્ટ ઉમેરવાનું સ્કુબા ગિયર અથવા કૉર્ન ડૉગ ટૂલ આઈ ફોન પર ઉપલબ્ધ છે. ટૂંક સમયમાં તે એન્ડ્રોઈડ ડિવાઈસ પર ઉપલબ્ધ થશે. તેનો ઉપયોગ કરવા જે ફોટો અપલોડ કરવો હોય તે પસંદ કરીને મેજિક વૉન્ડ આઈકન પર ક્લિક કરો. ટેક્સ્ટ ઑવરલે ઑપ્શન અને સ્ટિકર્સનો ઉપયોગ ફેસબુકના બીજા ભાગમાં કરી શકાય.

અનસબસ્ક્રાઈબ

ધારો કે કોઈએ ફેસબુક પર લોકપ્રિય થયેલી કે પછી વાયરલ થયેલી પોસ્ટ અથવા કોઈ વિશેષ ચેટિંગ ગ્રૂપની પોસ્ટ પર કોઈ કમેન્ટ મોકલી હોય અને તમને જાણતા અથવા તમારા માટે અજાણ્યા કદાચ કમેન્ટ પર ખિજાઈ જાય અથવા અણછાજતી કમેન્ટ પોસ્ટ કરે તો બ્રાઉઝરના જમણા ખૂણે ગ્લોબ આઈકન પર ક્લિક કરીને બંધ કરી શકો. જરૂર પડ્યે નોટિફિકેશનનું સેટિંગ બદલી શકો. ઓરિજિનલ પોસ્ટ જોવા મોબાઈલ પર ક્લિક કરો. પછી પોસ્ટની ટોચ પરના જમણા ખૂણે ક્લિક કરતાં તમને નોટિફિકેશન ઑફ કરવાનું ઑપ્શન દેખાશે.

ફેસબુક પર આનંદના સમાચાર પોસ્ટ કરતી વખતે સંયમ જાળવો

ફેસબુક પર તમારા જીવનની મહત્ત્વની ઘટના જેમ કે સગાઈ અથવા લગ્નની તારીખ વગેરેની પરદેશ રહેતા મિત્રોને અગાઉથી જાણ કરતી વખતે માત્ર સાદા શબ્દોમાં જાણ કરો. તમારા સગાં કે મિત્રો કે પછી ઓળખીતા તમને અભિનંદન પોતપોતાની રીતે આપવાના જ છે. બીજું એ કે કેટલાક દંપતીઓ કજિયો કંકાસને લીધે છૂટાછેડા લેવાનો નિર્ણય કરે તો ફેસબુક પર પોતાના મિત્રોને સંદેશ મોકલે છે. ગામ આખામાં ઢંઢેરો પીટવાને બદલે તમે પ્રોફાઈલમાં જઈને માત્ર ફેમિલી સેકશનમાં જઈને માત્ર તેમને જાણ કરી શકો. પહેલાં ગ્રે આઈકન દબાવો ત્યારપછી રિલેશનશિપ બદલો ત્યારપછી સંદેશ મોકલો. આમ કરવાથી તમારી વાત ખાનગી રહેશે.

સિક્યોરિટી ચેક

ફેસબુક પર હાલમાં ચેક–અપ ટૂલ ઉમેરવામાં આવ્યું છે તે વપરાશકર્તાને પોતાના અકાઉન્ટ સલામત રાખવાનું માર્ગદર્શન આપે છે. તેમાં વેબ બ્રાઉઝર પર લોગઆઉટ કરવાની અને જે ઍપ્સનો ઉપયોગ કરવો ન હોય તે બંધ કરવાની, કોઈ અજાણ્યું અકાઉન્ટ ખોલવાની કોશિશ કરે તો એલર્ટ સિગ્નલ ડિવાઈસ પણ છે. જો કે આ ડિવાઈસ માત્ર કમ્પ્યુટર પર સિક્યોરિટી ચેક માટે છે પણ હજુ મોબાઈલ ઍપ પર ઉપલબ્ધ નથી કરાઈ. તો મિત્રો, ફેસબુકની લાક્ષણિકતા અને તેનો સલામત ઉપયોગ કરવાની ટિપ્સનો ઉપયોગ કરી જોજો.

સેલફોનનો સનેપાત

મોબાઈલ ફોનની જરૂરિયાત હોવી એક વાત છે, ઘેલછાં એ બીજી વાત છે, ઉન્માદ નોખી વાત છે અને ફોબીયા કે ગાંડપણ એ નવો રોગ છે. એવા ઘણા છે જે સતત એવા ભયના ઓથાર હેઠળ જીવે છે કે તેમને જયારે મોબાઈલની ખરેખરી જરૂર હશે ત્યારે એ તેમને હાથવગો નહી હોય. આ ઉપરાંત આવા કેટલાક લક્ષણો છે જે મોબાઈલના વપરાશકર્તાઓમાં ઘર કરી ગયા છે અને લક્ષણોએ હવે એક પ્રકારની માનસિક વ્યાધિઓનું રૂપ ધારણ કરી લીધું છે.

માનસિક ચિકિત્સકોના મત પ્રમાણે આ પ્રકારના લક્ષણો ધરાવનારાઓ આગળ જતા એક ગંભીર માનસિક સમસ્યાનો શિકાર પણ થઈ શકે છે.

- તમે ટોઈલેટમાં હો, ડાઈનિંગ ટેબલ પર ડિનર લેતા હો, ડ્રાઈવિંગ દરમિયાન ટ્રાફિક સિગ્નલ પર અટક્યા હો કે પછી સ્ટોરમાં શોપિંગ પછી બીલ ચૂકવવાની લાઈનમાં ઊભા હો તમે દર મિનિટ બે મિનિટે તમારો મોબાઈલ ચેક કરો છો. ઘણી વાર આ સમયગાળો સેકંડોનો પણ હોય છે.
- અંગ્રેજી ભાષામાં ટેક્સ્ટાફેનિયા તરીકે ઓળખાતા આ લક્ષણનો અર્થ છે કે તમને અમુક ચોક્કસ મિનિટો પછી એમ લાગે છે કે તમારા ઈનબોક્સમાં મેસેજ આવ્યો છે. જયારે હકીકતમાં એવું નથી હોતું. આની બીજી કક્ષા એ છે કે તમે મેસેજ મોકલ્યો ન હોય કે તમને મેસેજ આવ્યો ન હોય તો તમને પેનીક એટેક આવે છે. તમને એક પ્રકારની વ્યાકુળતા ઘેરી વળે છે.
- તમને ફેન્ટમ ફોન સિન્ડ્રોમ નામનું લક્ષણ ઘેરી વળે છે. કોઈ મેસેજ અથવા ફોન ન હોવા છતા તમને એવો ભાસ થાય છે કે તમારો મોબાઈલ રણક્યો છે.
- તમે તમારા મોબાઈલને ક્ષણભર માટે અળગો પણ નથી મૂકતા અને સ્વીચ ઓફ નથી કરતા. બેટરી ડ્રેઈન થવાના કારણે અમુક મિનિટો માટે પણ ફોન બંધ થાય તો તો પણ તમે વિહવળ બની જાઓ છો. આ ઉપરાંત મોબાઈલ તમારા ખિસ્સામાં અથવા પર્સમાં સતત હાથવગો હોય એની તમે તકેદારી લો છો.
- તમે રાત્રિના નિદ્રાધીન થાઓ ત્યારે એ વાતની તકેદારી રાખો છો કે ફુલ વોલ્યુમમાં ઓન મોબાઈલ તમારી પડખે હોય. સૂતા પહેલા અને જાગીને તમે પહેલું કામ તમારા મોબાઈલને ચેક કરવાનું કરો છો.
- તમારી નજીકના લોકો પણ એમ કહેવા લાગ્યા છે કે ફરિયાદ કરવા લાગ્યા છે કે તમે મોબાઈલ તરફ વધુ પડતું ધ્યાન આપો છો અને ક્ષણભર પણ એનો વિયોગ સહન નથી કરી શકતા. તમે જવાબ સાથે હંમેશા તૈયાર હો છો કે ઓફિસનું કામ હતુ કે પછી અમથુ જ તમે કોમ્યુનિકેશન ચેક કરી રહ્યા હતા.
- તમે તમારી જાતને એમ મનાવી લો છો કે તમે મેસેજ મોકલવા સાથે વાત કરવી, સાંભળવું, ડ્રાઈવ કરવું જેવા એક સાથે બે કામ અત્યંત સરળતાથી કરી લો છો.

ઈન્ટરનેટની સ્પીડ જોઈતી હોય તો ઘરમાંથી હટાવી લો આ વસ્તુઓ...

આજના જમાનામાં ઈન્ટરનેટ સૌથી મહત્વની અને જીવન જરૂરી વસ્તુ બનતી જાય છે. ઈન્ટરનેટે યુવાનોને પોતાના આદિ કરી દીધા છે. હાલમાં મોટાભાગના મોઢે એક ખાસ વાત સાંભળવા મળતી હોય છે કે ઈન્ટરનેટની સ્પીડ નથી. આવા જ લોકો માટે ખાસ સમાચાર છે જેમણે ઈન્ટરનેટની સ્પીડ હંમેશા ઓછી લાગે છે. જો તમે હાઈસ્પીડનું ઈન્ટરનેટ પેક એક્ટિવ કરાવ્યું છે છતાં તમારી સ્પીડ સ્લો છે? તો તમારી માટે છે ખાસ ઉપાય જે તમારી ઈન્ટરનેટ સ્પીડને વધારવામાં મદદ કરી શકે છે. જો તમારા ઘરે ઈન્ટરનેટ કનેક્શન છે તો રાઉટની નજીક ઈલેક્ટ્રીક લેમ્પ, કોડલેસ ફોન જેવી વસ્તુઓ તમારી ઈન્ટરનેટ સ્પીડ ઘટાડી શકે છે.

ઈન્ટરનેટના ઉપયોગ સમયે આ વસ્તુઓને દુર રાખવી કે તેનો ઉપયોગ કરવાનું ટાળવું આમ કરવાથી તમને ઈન્ટરનેટની યોગ્ય સ્પીડ મળી રહે છે. એક વેબસાઈટે પોતાના સર્વેના આધારે જણાવ્યું છે કે તમારી આસપાસની કેટલી વસ્તુઓ તમારી ઈન્ટરનેટ સ્પીડ પર અસર કરે છે. જેવી કે હેલોજન લેમ્પ, સ્ટીરિયો કે કોમ્પ્યુટરના સ્પીકર્સ, ટીવી અને એસી પાવર કાર્ડ જેવી વસ્તુઓ ઈન્ટરનેટની સ્પીડમાં ઘટાડો કરી શકે છે. માટે ઈન્ટરનેટની સ્પીડ માટે રાઉટરને ખુલ્લી જગ્યા પર કે હ્યા ટેબલ પર રાખવું જોઈએ. જેથી રાઉટર પોતાનું કાર્ય સરળતાથી કરી શકે.

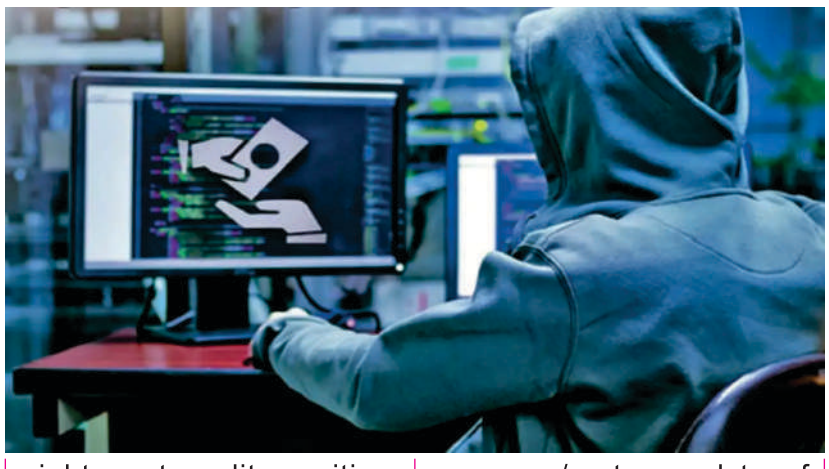
CYBERABAD POLICE ISSUES NOTICES TO 11 ORGANISATIONS IN PROBE OF DATA THEFT



The Cyberabad police has issued notices to as many as 11 organisations, including three banks, a social media giant and an Information Technology services company, asking their representatives to appear before it in connection with a breach of data of 66.9 crore persons across the country, a senior police official said on Sunday. The Cyberabad police on Saturday said they arrested one person, Vinay Bhardwaj, who was allegedly involved in stealing, holding and selling personal and confidential data of 66.9 crore individuals and organisations belonging to 24 states and eight metropolitan cities, maintained in 104 categories.

The accused person was found in possession of the data of students of ed-tech organisations as well as the GST details of persons and companies, and the consumer/customer data of major organisations such as road transport corporations of various states, major ecommerce portals, social media platforms and fintech companies.

The 11 organisations to whom the notices were issued include two PSU banks and one private bank, a social media giant, an IT services company, an online grocery seller, a digital payments app and an online insurance platform, police said.

The 11 organisations' representatives have been told to appear before the police during the next one week to furnish details on how the companies maintained their databases, what procedures and policies were followed in this regard and who could access the data. This could help investigators ascertain how the database was leaked and accessed by an "unauthorised" person, among other relevant details, police said.

The arrested accused was operating through a website, 'InspireWebz', at Faridabad, Haryana and selling databases to clients through cloud drive links, police said.

In March, Cyberabad Police arrested seven people of a gang who were allegedly involved in the theft and sale of sensitive data of the government and important organisations, including details of 2.55 lakh defence personnel as well as the personal and confidential data of about 16.8 crore citizens across the country.

SURVEY SHOWS 'HIGH-LEVEL' PUBLIC SUPPORT FOR SOME FORMS OF GOVERNMENT SURVEILLANCE

A survey has shown a "high-level" of public support for certain forms of government surveillance like through CCTV cameras even as the poor and groups such as Dalits and Muslims have the "least" trust in the police.

Surveyors from NGO Common Cause and the Lokniti programme of the Centre for the Study of Developing Societies spoke to a total of 9,779 individuals in 12 states and Union Territories before they released the "Status of Policing in India Report 2023: Surveillance and the Question of Privacy" on Friday in the national capital.

"The study also involved focus group discussions with domain experts, in-depth interviews with serving police officials, and an analysis of media coverage of surveillance-related issues," according to a statement.

The findings of the survey, according to the statement, indicate a "high-level of public support for certain forms of government surveillance, but also a lack of public awareness regarding critical issues such as the Pegasus scandal and the Puttaswamy case." While the Pegasus refers to the alleged usage of military grade spyware for surveillance, the judgment in the Puttaswamy case formally recognised right to privacy as a fundamental right.

The survey report states that the support for any form of surveillance is "directly proportional" to the respondent's socio-economic status, i.e. the richer the respondent the more the support, the survey found.

The poor, Adivasis, Dalits, and Muslims trust the police the least, it found.

Some of the key findings of the survey state that "only one in four people strongly feel that CCTVs carry a risk of illegal mass surveillance." "Nearly three out of four people strongly believe that CCTVs help monitor and reduce crimes," it said.

The survey found, according to the press statement, that about half of the respondents supported the collection of biometric details of suspects while Adivasis and Muslims were "most critical" of the police collecting biometric details of all suspects.

More than one out of two people strongly support the use of drones by the armed forces, government, and police. However, farmers and the poorest are most likely to oppose drone usage by government agencies, the survey found.

This Indian City Used Facial Recognition to Enforce COVID-19 Policy

"One out of two people fully support the use of FRT (facial recognition technology) by the government, and police. People are four times more likely to strongly support the use of FRT by government agencies, compared to its use by private entities," the survey found. Nearly two out of three respondents believe that political parties surveil citizens for electoral gains, it said.

The survey also found that large sections of the respondents feel government surveillance by CCTVs (52 percent), drones (30 percent) and FRT (25 percent), etc. to suppress protests and political movements are "justified" to a great extent.

However, it said, the respondents from Punjab are least likely to support government surveillance during protests, while those from Gujarat are most likely to support it.

Retired Uttar Pradesh Police and BSF Director General Prakash Singh said the authorisation for putting up surveillance tools should only be handled by the government.

"In India there are certain agencies that have been authorised to put people under surveillance, but the sanction must come from the Home Ministry. About one lakh sanctions for surveillance are given every year, which works out to about 250 per day. Can there be judicious application of mind with such a large number?" "There is no liability provision, if it is found that a wrong person has been put under surveillance. Due application of mind is not happening today," Singh, one of the most prominent faces who worked for police reforms in the country, said.

KRISTECH SOLUTIONS LLP
An ISO I 9001 I 14001 I 45001 Company

Kristech, A well known name in Gujarat, offering Dell Brand Recertified products is now also known as largest refurbisher in India offering "Kristech Brand Premium Quality and Value for Money ,Certified Refurbished devices"

Looking at the high demand of pre-owned IT hardware devices, like, Laptops, Desktops, Servers, Workstations, Monitors and many more from its Channel Partners, Kristech has developed a state of the art refurbishing facility set up at 17000 Sq.Ft. area in the heart of Ahmedabad town with a build up capacity to deliver more than 25000 units per month

"Kristech Solutions LLP is managed by a team of visionary leaders and entrepreneur's who has spent almost more than 20 years in IT industry"

Kristech is an ISO certified company and maintains highest level of operating standards.

Kristech offers a product after thoroughly passing the strict 35 points quality check points for its functionality. These products are technically and cosmetically in very good condition which ensures high level of customer satisfaction is guaranteed. These products are backed up by Kristech warranty

VISION

We will be the most valued, trusted and dependable organization of all our business partners.

MISSION

To Reach Pan India Channel Partners, by providing high quality, affordable, innovative and Value for Money Refurbished devices, mainly Laptops and Desktops

VALUES

Energy — Capture opportunities and make things happen

Excellence — Do things better than anyone-else in the industry

Excitement — Foster openness, respect and trust to create excitement

BLOCKCHAIN IMPACT LAB LAUNCHED IN HYDERABAD-BASED INDIAN SCHOOL OF BUSINESS

A dedicated impact lab aimed at developing and working around blockchain technology has been set up at the Hyderabad campus of the Indian School of Business (ISB), complete with an Ethereum virtual machine, Hyperledger Fabric, and support for multi-chain ecosystems — making for an adequate space for testing blockchain-based protocols and solutions. The launch of this facility comes at a time when international blockchain firms are turning to India, seeking developers and technologically advanced engineers.

ISB's Blockchain Impact Lab will operate as a physical facility, as well as a virtual establishment to ensure that it can benefit developers outside ISB as well.

Training sessions around blockchain uses will also be provided via this lab to benefit developers.

DLabs, which was set up within the ISB campus last year to incubate potential start-ups, has teamed up with S&P Global, an intelligence and tech firm, to back up the Blockchain Impact Lab.

"We are providing a platform for students, faculty, start-ups and upcoming entrepreneurs to create a significant societal impact," Nilam Patel, Managing Director - India Operations, S&P Global India, said in a prepared statement.

India, that has the largest and the youngest population in the world, is known to produce skilled engineers. The government of India has been putting a lot of focus on supporting up-and-coming startups in the nation and blockchain is a new technology that has triggered an interest in India.

In January this year, government-backed think tank NITI Aayog launched a blockchain module to help local developers explore the potential of the sector with experimental use-cases, trials, and possible errors. The move backed Finance Minister Nirmala Sitharaman's repeated statements over India's inclination to explore cryptocurrencies' underlying blockchain tech to its potential, despite scepticism towards cryptocurrencies in general.

JAPAN AIMS TO TREBLE SALES OF DOMESTICALLY PRODUCED MICROCHIPS TO JPY 15 TRILLION BY 2030

Japan's industry ministry said on Monday it aimed to treble sales of semiconductors made in Japan to JPY 15 trillion (roughly Rs. 9,285,004,593,300 crore) by 2030 as Tokyo strives to boost domestic microchip production following global supply chain snarls.

Japan sees microchips as strategic products to strengthen its economic security and is providing hefty subsidies to Taiwan Semiconductor Manufacturing Co (TSMC) and others to build plants in Japan or have them expand existing facilities.

The ministry plans to put the sales target in Japan's semiconductor and digital industry strategy, which will be updated by the middle of the year.

Japan has seen its share in the global microchip market tumble from 50 percent in the late 1980s to around 10 percent, outperformed by nimbler rivals with deep pockets such as South Korea's Samsung Electronics.

Last week, Japan said it would restrict exports of 23 types of semiconductor manufacturing equipment, aligning its technology trade controls with a US push to curb China's ability to make advanced chips.

Japan, home to major global chip equipment makers such as Nikon and Tokyo Electron, did not specify China as the target of the measures, saying equipment makers would need to seek export permission for all regions.

"We are fulfilling our responsibility as a technological nation to contribute to international peace and stability," Minister for Economy, Trade and Industry Yasutoshi Nishimura told a news conference.

Japan wants to stop advanced technology being used for military purposes and does not have one specific country in mind with the measures, he said.
