SEARCH INFOTECH RECENTLY RE-INAUGURATED AT A
NEW LOCATION WITH COMPLETELY REFRESHED LOOK

Mr. Hiren Gajera and his team have recently re-inaugurated their main office at a new location with a completely refreshed look. The store, which specializes in the retail

and distribution of both new and used computers, laptops, and computer accessories, was inaugurated on Sunday, March 16th, 2025. The opening was celebrated with

Shree Bhikhudada Shastri from Junagadh, along with Search Infotech's team members, parents, and family. The event was well-attended by dealers, family members,

association partners, and committee members, all of whom offered their blessings to Mr. Hiren Gajera and Mr. Vivek Vekariya. Search Infotech operates multiple

branches across various cities. In Surat, they have two locations: the main office at Hirabag, Varachha Road, and another office at Timaliyawad, Nanpura Surat.

NVIDIA LOOKS TO EXPAND AI REIGN WITH NEW CHIPS, PERSONAL SUPERCOMPUTERS

Jensen Huang, Nvidia's chief executive officer, used his annual developer conference to address concerns that the cost of artificial intelligence computing is spiraling out of control.

At the event, Huang unveiled more powerful chips and related technology that he said would provide a clearer payoff to customers. The lineup includes a successor to Nvidia's flagship AI processor called the Blackwell Ultra, as well as additional generations stretching into 2027. Huang also unveiled Dynamo-branded software that will fine-tune existing and future equipment, making it more efficient and profitable.

"It is essentially the operating system of an AI factory," Huang said during a roughly two-hour presentation at the company's annual GTC event in San Jose, California, which touched on everything from robot technology to personal supercomputers.

The conference, once a little-known gathering of developers, has become a closely watched event since Nvidia assumed a central role in AI — with the tech world and Wall Street taking its cues from the presentation. Huang introduced a variety of hardware, software and services during his speech, though there were no bombshell revelations for investors. The stock closed down more than three percent on Tuesday.

Nvidia, once focused on computer gaming chips, has become a tech powerhouse involved in myriad fields. At

the event, Huang said the new Blackwell Ultra processor lineup would arrive in the second half of 2025. It will be followed by a more dramatic upgrade called "Vera Rubin" in the latter half of 2026.

The announcements also included:

A platform called Isaac GR00T N1 that will "supercharge humanoid robot development." Nvidia is working with Walt Disney Co. and Google's DeepMind on the project, which will be open to outside developers.

A partnership with General Motors Co. that will add AI to next-generation cars, factories and robots.

A wireless project involving companies such as T-Mobile US Inc. and Cisco Systems Inc. Nvidia will help create "AI-native" wireless network hardware for new 6G networks, the successor to today's 5G.

New Nvidia-based personal supercomputer systems from Dell Technologies Inc., HP Inc. and other manufacturers. Developers and scientists will be able to use the devices to work on AI models at their desks.

It's a pivotal moment for Nvidia. After two years of stratospheric growth for both its revenue and market value, investors in 2025 have begun to question whether the frenzy is sustainable. These concerns were brought into focus earlier this year when Chinese startup DeepSeek said it had developed a competitive AI model using a fraction of the resources.

DeepSeek's claim spurred doubts over whether the pace of investment in AI computing infrastructure was warranted. But it was followed by commitments by Nvidia's biggest customers, a group that includes Microsoft and Amazon.com's AWS, to keep spending this year.

The biggest data center operators — a group known as hyperscalers — are projected to spend \$371 billion (roughly Rs. 32,10,561 crore) on AI facilities and computing resources in 2025, a 44 percent increase from the year prior, according to a Bloomberg Intelligence report published Monday. That amount is set to climb to \$525 billion (roughly Rs. 45,43,247 crore) by 2032, growing at a faster clip than analysts

expected before the viral success of DeepSeek.

But broader concerns about trade wars and a possible recession have weighed on Nvidia's stock, which is down 14 percent this year. The shares fell 3.3 percent to \$115.53 (roughly Rs. 9,997) by the close of New York trading Tuesday.

The GM news hurt shares of Mobileye Global Inc., which develops self-driving technology. The stock fell 3.5 percent to \$14.44 (roughly Rs. 1,250). The company, majority-owned by Intel Corp., had its initial public offering in 2022.

The weeklong GTC event is a chance to convince the tech industry that Nvidia's chips are still must-haves for AI — a field that Huang expects to spread to more of the economy in what he's called a new industrial revolution. Huang noted that the event has been described as the "Super Bowl of AI."

The most important issue facing Nvidia is whether AI capital spending will continue to climb in 2026, Wolfe Research analyst Chris Caso said in a note previewing the event.

"AI stocks have been down sharply on recession fears, and while we think AI spending is the last place cloud customers would wish to trim budgets, if the areas that fund those budgets suffer, that could put some pressure on capex."

On that front, Huang didn't seem to soothe investors' concerns. But he offered a road map for future chips and unveiled a breakthrough

system that relies on a combination of silicon and photonics — light waves.

Nvidia also announced plans for a quantum computing research lab in Boston, aiming to capitalize on another emerging technology.

Nvidia, based in Santa Clara, California, has suffered some production snags as it works to rapidly upgrade its chips. Some early versions of Blackwell required fixes, delaying the release. Nvidia has said that those challenges are behind it, but the company still doesn't have enough supply to meet demand. It has increased spending to get more of the chips out the door, something that will weigh on margins this year.

Huang said the top four public cloud vendors — Amazon, Microsoft, Alphabet Inc.'s Google, and Oracle Corp. — bought 1.3 million of Nvidia's older-generation Hopper AI chips last year. So far in 2025, the same group has bought 3.6 million Blackwell AI chips, he said.

After Vera Rubin debuts in the second half of next year, Nvidia plans to release a version a year later called Rubin Ultra. Vera Rubin's namesake was an American astronomer credited with helping discover the existence of dark matter.

The generation of chips after that will be named Feynman, Huang said. The name is a likely reference to Richard Feynman, an American theoretical physicist who made contributions to quantum mechanics.

HP OMEN 16 SLIM GAMING LAPTOP WITH NVIDIA GEFORCE RTX 5070 GPU UNVEILED; OMEN TRANSCEND 14 REFRESHED

HP announced its Omen 16 Slim gaming laptop at the HP Amplify 2025 conference on Tuesday. As the name suggests, the new laptop comes with a slimmer design when compared to the standard Omen 16 model. The laptop can be configured with up to Intel Core Ultra 9 285H processors (Intel Arrow Lake CPUs) and Nvidia GeForce RTX 5070 laptop GPU. The brand has also refreshed its Omen Transcend 14 gaming laptop with the same CPU and GPU as the Omen 16 Slim.

The price and availability details of HP Omen 16 Slim and Omen Transcend 14 are yet to be revealed.

HP Omen 16 Slim Specifications

The HP Omen 16 Slim gaming laptop has a slim build and portable design compared to the standard Omen 16 gaming laptop. The new model can be configured

with up to Intel Core Ultra 9 285H processors and up to Nvidia GeForce RTX 5070 laptop GPU. The laptop gets a 16-inch (1,600x2,560 pixels) IPS display with 240Hz refresh rate and 3ms response time. It can be

paired with up to 32GB of memory and up to 1TB of storage.

For connectivity, HP Omen 16 Slim supports up to Wi-Fi 6E and Bluetooth 5.4. It includes a 1080-pixel full-HD Webcam, a 70Wh battery, and offers a dual-speaker setup with DTS:X support.

HP Omen Transcend 14 Specifications

HP's Omen Transcend 14 gaming laptop has been refreshed with the same CPU and GPU hardware as the Omen 16 Slim. Therefore, you can configure the laptop with up to Intel Core Ultra 9 285H processors and Nvidia GeForce RTX 5070 laptop GPU. It is claimed to offer 25

percent more TGP than older models. The laptop boasts a 14-inch K (2,880 x 1,800) OLED display and is backed by a 71Wh battery. It offers Wi-Fi 7, Bluetooth 5.4 for connectivity and sports a 1080p Webcam.

Both HP Omen 16 Slim and Omen Transcend 14 are confirmed to ship with HP's Omen AI solution that recommends the best system, hardware, and gaming settings based on each device and game to enhance the gaming experience. It can be accessed from the Omen Gaming Hub.

SITA INAUGURATES NEWLY RENOVATED OFFICE IN SOUTH GUJARAT

South Gujarat Information Technologists Association (SITA) proudly inaugurated its newly renovated office on March 23, 2025, at 11:00 AM. The grand event was graced by the esteemed presence of Mr. Ashish Dhakan, MD & CEO of Prama Hikvision Private Limited, as the Chief Guest. The association's President, Mr. Hemant Patel, led the inauguration

ceremony, marking a significant milestone in SITA's journey. The newly renovated office spans 1,700 sq. ft., is fully air-conditioned, and features a state-of-the-art 1100 sq. ft. conference room equipped with cutting-edge digital technology. The facilities include an interactive panel, a surround sound system, smart TVs, a dedicated product display area, and high-speed WiFi, ensuring a seamless and modern conference experience for IT professionals. South Gujarat Information Technologists Association founded in 1996 in Nanpura, Surat, SITA has been a driving force for the region's IT fraternity. The association

remains committed to its mission of educating, promoting, and supporting IT professionals and businesses in South Gujarat. SITA regularly organizes exhibitions, blood donation drives, technical upgradation programs, family gatherings, technical webinars, and sports activities to foster engagement and growth within the IT community. With the launch of this renovated office, SITA is poised to further enhance knowledge-sharing, innovation, and professional growth within the industry. Speaking on the occasion, Mr. Hemant Patel expressed his enthusiasm, stating, "This renovated facility is a testament to our ongoing

commitment to the IT community in South Gujarat. We believe this space will serve as a hub for collaboration, learning, and progress in the ever-evolving field of technology." The ceremony was hosted by Mr. Bashir Mansuri, and the vote of thanks was delivered by Mr. Javed Nalbandh. The event was attended by distinguished industry leaders, association members, and IT professionals, who lauded SITA's initiatives and vision for the future. The renovated office is expected to host various IT-centric events, training sessions, and networking opportunities to benefit the region's IT ecosystem.

The conference room is available for industries and professionals at nominal charges:

- ₹. 5,000 plus GST for a 4-hour session (accommodates up to 50 participants).
- An annual package of ₹30,000 plus GST, which includes 10 sessions of 4 hours each, valid for two years.

SAURASHTRA SECURITY AND SURVEILLANCE ASSOCIATION (SSSA) SETS NEW STANDARDS IN EVENT PLANNING WITH CORDELIA CRUISES' EMPRESS

Mr. UDAYKUMAR BHOJANI
EDITOR - PCT Magazine
MEDIA PARTNER - SSSA

The Saurashtra Security and Surveillance Association (SSSA) recently organized a two-night trip to the Arabian Sea on Cordelia Cruises' Empress, India's first international cruise ship. This meticulously planned event

showcased SSSA's attention to detail and commitment to excellence in event planning. Cordelia Cruises' Empress offers a unique experience with its luxurious amenities and services. The ship features:

- 11 decks - Capacity for 2000 passengers - 737 luxurious cabins
- Over 600 crew members - Unlimited food and liquor

Onboard amenities include:

- Theater - Banquet hall - Swimming pool - Party deck - Gaming zone - Casino - Restaurants and more

260 members from Gujarat

enjoyed a unique experience onboard the luxurious cruise ship. The event was a testament to SSSA's capabilities in planning and executing large-scale events. "We are thrilled to have successfully executed this event, which demonstrates our commitment to excellence in planning and execution," said Krunal Godhasara, President of SSSA. "Our team worked tirelessly to ensure that every aspect of the trip, from travel to onboard amenities, was meticulously taken care of." SSSA's event planning

expertise ensured that every detail was carefully considered and executed. From the initial planning stages to the final execution, SSSA's team worked closely with Cordelia Cruises to ensure a seamless and enjoyable experience for all attendees. This event sets a new standard for event planning in the industry, showcasing SSSA's capabilities and commitment to excellence. SSSA looks forward to continuing to push the boundaries of event planning and execution in the future.

Mr. UDAYKUMAR BHOJANI
EDITOR - PCT Magazine
MEDIA PARTNER-SITA(SURAT)

South Gujarat Information Technology Association દ્વારા આયોજિત, SITA ટ્રામાં પ્રોગ્રામ ટ ફેબ્રુઆરી - ૨૦૨૫નાં રોજ સાંજે ૬.૩૦ થી રાત્રે ૧૧.૩૦ વાગ્યાના સમયગાળા દરમિયાન આયોજન કરવામાં આવ્યું હતું. તેના મુખ્ય કલાકારનાં નાટક રૂપે

સંજય ગોરડિયા શ્રી સંજયભાઈ ગોરડિયાને બોલાવવામાં આવ્યા હતા. આ કોમ્પિટિશનના જમાનામાં પાર્ટનર્સ આપ્યા મહીનામાં ખૂબ જ બીજી રહેતા હોય છે. આપણે રાત દિવસ સ્ટ્રેસ સાથે જીવીએ છીએ અને આપણી હેલ્થ જોખમીય છે અને સ્ટ્રેસને હિલ કરવાની

સૌથી મોટી જો કોઈ મેડીસીન હોય તો તે લાક્ષ્ણિક છે. તો SITA એસોસિએશને ગુજરાતમાં એક નવો કોન્સેપ્ટ તરીકે શ્રી સંજય ગોરડિયાનું નાટક લઈને આવ્યા હતા. SITA કાર્યક્રમનો ઉદ્દેશ્ય પાર્ટનર્સ અને તેમના ફેમિલીને આનંદનું વાતાવરણ અને મનોરંજન પૂરું પાડી તેમને હળવાશનો

અનુભવ કરાવવાનો હતો. SITA ના ઇવેન્ટ સ્પોન્સર્સ એવા Access Global Technology Pvt. Ltd. જે Tally 3 Star Certified પાર્ટનર છે તેમનો SITA ખુબ ખુબ આભાર માને છે. આ કાર્યક્રમ Drama Program ના ૧૧૦૦ પાસની વહેંચણી કરી

નાટકના કાર્યક્રમને સફળ બનાવવા માટે SITA ના પ્રમુખ શ્રી હેમંત પટેલ, SITA મેનેજિંગ કમિટી, પાસ્ટ પ્રેસિડન્ટ અને કામ કરતી તમામ ટીમના સભ્યશ્રીઓએ ખુબ મહેનત કરી આ કાર્યક્રમને સફળ બનાવ્યો હતો.

ઓપન એઆઈએ વિદ્યાર્થીઓ માટે ચેટજીટીપી પ્લસ ફ્રીમાં કર્યું

OpenAI દ્વારા એક નવી પહેલ શરૂ કરવામાં આવી છે. ચેટજીટીપી પ્લસનું સબસ્ક્રિપ્શન હવે વિદ્યાર્થીઓ માટે મફતમાં કરવામાં આવ્યું છે. અમેરિકા અને કેનેડાના વિદ્યાર્થીઓ ૩૧ મે સુધી મફતમાં એનો ઉપયોગ કરી શકશે. ફાઈનલ એક્ઝામ શરૂ થવા પહેલાં તેમણે ૩૧ માર્ચથી આ ઓફર શરૂ કરી હતી.

ચેટજીટીપી પ્લસનો ચાર્જ શું છે?

ચેટજીટીપી માટે એક મહિનાના અમેરિકામાં ૨૦ ડોલર ચાર્જ કરવામાં આવે છે. ભારતમાં એની કિંમત ૧૮૯૯ છે. આ સબસ્ક્રિપ્શનમાં મફત વર્ઝનમાં જે હોય એ તમામ ફીચર્સ જોવા મળશે. મેસેજ કરવાની મર્યાદા, ફાઈલ અપલોડ કરવી, ડેટા એનાલિસિસ કરવું અને ઇમેજ જનરેશન જેવી ફીચર્સની મર્યાદામાં વધારો કરવામાં આવ્યો છે. સ્ટાન્ડર્ડ અને એડવાન્સ વોઈસ મોડનો પણ એમાં સમાવેશ કરવામાં આવ્યો છે, જેમાં સ્ક્રીન શેરિંગ પણ થઈ શકે છે. આ સાથે જ ચેટજીટીપીના અલગ-અલગ મોડલનો ઉપયોગ યુઝર્સ કરી શકશે. GPT-૪.૫ અને વીડિયો જનરેશન મોડલ સોરાનો મર્યાદિત ઉપયોગ કરી શકાશે. આ યુઝર્સને દરેક નવા ફીચર્સ સૌથી પહેલાં ઉપયોગ કરવા મળશે. કોણ ઉપયોગ કરી શકશે આ ઓફરનો? આ ઓફરને ફક્ત વિદ્યાર્થીઓ ઉપયોગ કરી શકશે. આ વિશે ચેટજીટીપી કહે છે અમેરિકા

અમારી પાસેથી આગળ શું કરવું એની માહિતી મેળવી શકાય છે. આ કરવાથી અમને પણ જે-તે સ્કૂલ વિશે ખબર પડશે અને અમે એને અમારા લિસ્ટમાં સમાવેશ કરી શકીશું. એવું પણ બની શકે કે કોઈ ચોક્કસ સ્કૂલ આ સેવાનો લાભ ઉઠાવી ન શકતી હોય.

સ્ટુડન્ટ વેરિફિકેશન વિદ્યાર્થીઓ તેમના લાયકાતને ચેટજીટીપીની વેબસાઈટ પર જણાવી શકે છે. ત્યાર બાદ ચેટજીટીપી દ્વારા એ વિશે માહિતી મેળવવામાં આવશે, અને એને મંજૂર થઈ ગયે બાદ બે મહિના માટે યુઝરનું પ્લસ સબસ્ક્રિપ્શન એક્ટિવેટ થઈ જશે. પહેલાથી ચેટજીટીપી પ્લસનો ઉપયોગ કરનારા વિદ્યાર્થીના એકાઉન્ટમાં આ કેડિટ જોવા મળશે, જેનો ઉપયોગ તેઓ પાછળથી પણ કરી શકે છે.

આ સબસ્ક્રિપ્શન દ્વારા યુઝર્સને શું ફાયદો થશે?

સ્ટુડન્ટ લેવેર્સની નોટ્સ અથવા તો અન્ય ડેટાને સંક્ષેપમાં બનાવી શકશે, જેથી એનો મૂળ હેતુ જળવાઈ રહે. કોઈ પણ કોમ્પ્લેક્સ વિષયને ચેટજીટીપી ખૂબ જ સરળતાથી સમજાવી શકે છે. કોઈ પણ નિબંધ અથવા તો પ્રોજેક્ટ માટે નવીનની આઈડિયા અને એની કામગીરી માટે ચર્ચા વિચારણા કરી શકે છે. કોઈ પણ રિસર્ચ પેપરમાં આવેલા અધરા

શબ્દોને ઓળખી એના સરળ ભાષામાં અર્થ સમજાવી શકશે. યુઝર્સ પોતાના માટે સ્ટેટમેન્ટ, નિબંધ અથવા તો એપ્લિકેશન લખી શકશે. ગ્રામર, નવા શબ્દો શિખવા અને ભાષા શિખવા માટે પણ એનો ઉપયોગ થઈ શકે છે.

એજ્યુકેશન ટેકોલોજીમાં એક નવો બદલાવ

ચેટજીટીપીના સૌથી વધુ યુઝર્સમાં વિદ્યાર્થીઓનો પણ સમાવેશ થાય છે, જેઓ ઘણી વાર આ AI નો ઉપયોગ કરે છે. કોર્સ મેગેઝિન અનુસાર, અમેરિકામાં ચેટજીટીપીના જેટલા યુઝર્સ છે, એના ત્રીજા ભાગના યુઝર્સ ૧૮થી ૨૪ વર્ષના છે. તેમના દ્વારા જે જેટલું સર્ચ કરવામાં આવે છે, તેમાંથી ૨૫ ટકા અભ્યાસને લગતું હોય છે. વિદ્યાર્થીઓ AIની મદદથી તેમની વિચારવાની રીતમાં બદલાવ લાવી રહ્યા છે. તેઓ નવા-નવા આઈડિયાને એક્સપ્લોર કરી રહ્યા છે.

અભ્યાસ માટે હવેથી ઘણી AI કંપનીઓ શરૂ થઈ રહી છે હાલમાં જ ક્લાઉડે કરીને એક નવી AI સર્વિસ શરૂ થઈ છે. એમાં વિદ્યાર્થી માટે લર્નિંગ મોડ આપવામાં આવ્યો છે, એના દ્વારા વિદ્યાર્થી તેમના વિચારને વિકસિત કરી શકે છે અને નવું શીખી શકે છે. ખૂબ જ અધરા પ્રશ્નોના જવાબ કેવી રીતે આપવા અને સોલ્યુશન કેવી રીતે લાવવું એ એમાં શીખી શકાય છે. નોર્થઈસ્ટર્ન યુનિવર્સિટી અને લંડન સ્કૂલ ઓફ ઇકોનોમિક્સ દ્વારા આ સેવા વિકસાવવામાં આવી છે.

સમાનતાનો અધિકાર

OpenAI દરેકને સમાનતાનો હક આપી રહી છે. કેલિફોર્નિયા સ્ટેટ યુનિવર્સિટીની સિસ્ટમમાં ચેટજીટીપીનો સમાવેશ કર્યો છે, તેમણે પાર્ટનરશિપ કરી છે. જોકે, જેમની પાસે આ પ્રકારની સિસ્ટમ નથી, તેમના માટે ચેટજીટીપી દ્વારા મફતમાં સેવા આપવાનું નક્કી કરવામાં આવ્યું છે. આ સર્વિસ બે

મહિના પૂરતી છે, કારણ કે હમણાં પરીક્ષાનો સમય છે. વિદ્યાર્થીઓને AI સાથે પહેલેથી ટેવ પાડવામાં આવી રહી છે. ભવિષ્યમાં AIનો વધુ ઉપયોગ થવાનો છે, આથી તેમને અત્યારથી જ એનો ઉપયોગ કરવા માટે પ્રેરિત કરવામાં આવી રહ્યું છે.

શીખવા માટેનું નવું ટૂલ

OpenAI દ્વારા વિદ્યાર્થીઓને મફતમાં સબસ્ક્રિપ્શન આપવાની સાથે તેમના માટે નવું પ્લેટફોર્મ પણ શરૂ કરવામાં આવ્યું છે, જેને OpenAI એ કેડમી તરીકે ઓળખવામાં આવી રહી છે. આથી, તેમને શીખવા માટે જેની પણ જરૂર પડે એ આ પ્લેટફોર્મ દ્વારા તેમને દરેક સુવિધા પૂરી પાડવામાં આવશે. વિદ્યાર્થીઓ ચેટજીટીપીનો ઉપયોગ એક શોર્ટકટ તરીકે નહીં, પરંતુ શીખવા માટેના એક નવા ટૂલ તરીકે કરે ધ્યાન રાખવામાં આવી રહ્યું છે.

બે મહિના પછી શું થશે?

ચેટજીટીપી દ્વારા બે મહિના માટે આ સબસ્ક્રિપ્શન મફતમાં આપવામાં આવ્યું છે. બે મહિના બાદ એ પૂરે ત્યારે વિદ્યાર્થીઓ દ્વારા એ માટે પૈસા ચૂકવવા પડશે. જેમણે પૈસા ન ચૂકવવા હોય, તેઓ મફત વર્ઝનનો ઉપયોગ કરી શકે છે. જોકે, વિદ્યાર્થીઓ માટે ચેલેન્જ એ છે કે બે મહિનામાં તેઓ પ્રીમિયમ ટૂલનો ઉપયોગ કરવા માટે આકર્ષિત થઈ ગયા હશે. યુનિવર્સિટી અને કોલેજો દ્વારા પણ વિચારવું જરૂરી છે કે AI તેઓના પ્રોજેક્ટ અને અસાઈનમેન્ટ માટે એટલું આવશ્યક છે કે નહીં. AIમાં શીખવવાની પરીક્ષા કેટલાક નિષ્ણાતોનું કહેવું છે કે આ કોઈ પ્રચાર નથી, પરંતુ AIને એજ્યુકેશનમાં કેવી રીતે સમાવેશ કરવો એ માટેનું પરિશ્રમ કરવામાં આવી રહ્યું છે. AI અત્યંત ઝડપથી સ્કૂલમાં પણ પહોંચી જશે, અને એની મદદથી યુઝર્સ કેવી રીતે નવી સ્ટડી, રિસર્ચ અને માહિતી મેળવી શકે એ જોવું રહ્યું.

HONOR MAGIC 6 PRO 5G WITH SNAPDRAGON 8 GEN 3 SOC, 108-MP PERISCOPE CAMERA LAUNCHED

Honor Magic 6 Pro 5G has been launched in India on Friday (August 2). The flagship phone runs on Qualcomm's Snapdragon 8 Gen 3 SoC and boasts a 6.8-inch LTPO display. It features a triple rear camera setup comprising a 180-megapixel periscope sensor. The handset has a 50-megapixel front camera and is backed by a 5,600mAh battery with support for both wired and wireless charging. The Honor Magic 6 Pro 5G has an IP68-rated build for dust and water resistance.

Honor Magic 6 Pro 5G price in India, availability

The price of Honor Magic 6 Pro 5G is set at Rs. 89,999 for the 12GB RAM + 512GB storage version. It is available in Black and Epi Green colour options and will go on sale starting 12:00am on August

15 across Amazon, Explorehonor.com, and mainline stores.

Honor Magic 6 Pro 5G can be grabbed with no-cost EMI options starting at Rs. 7,500 for 12 months. HonorTech confirms that there will be no price drop on the device for the next 180 days.

Honor Magic 6 Pro 5G specifications

The dual SIM (Nano) Honor Magic 6 Pro runs on the

company's MagicOS 8.0 interface based on Android 14 and features a 6.8-inch full-HD+ (1,280x2,800 pixels) quad-curved display with an adaptive refresh rate ranging from 1Hz to 120Hz and 93.20 percent screen-to-body ratio. The display is touted to deliver a peak HDR brightness of 5,000 nits and PWM dimming frequency of 4320Hz. The screen has TÜV Rheinland Flicker Free and

TÜV Rheinland Circadian Friendly certifications. It has Honor's in-house Nano crystal shield that is claimed to provide 10x toughness protection against accidental drops.

Honor Magic 6 Pro 5G runs on the 4nm Snapdragon 8 Gen 3 SoC, paired with 12GB of RAM and 512GB of storage. It has a triple rear camera setup, comprising a 180-megapixel 2.5x periscope telephoto camera with OIS support and 100x digital zoom, a 50-megapixel H9000 HDR camera with a variable aperture of f/1.4 to f/2.0, and a 50-megapixel ultra-wide-angle camera with autofocus. On the front, it has a 50-megapixel camera with a wide-angle lens and 3D depth sensing.

Connectivity options on the Honor Magic 6 Pro 5G include

5G, Wi-Fi, Bluetooth, GPS/AGPS, Galileo, GLONASS, Beidou, OTG, and a USB Type-C port. It is IP68-rated for dust and water resistance. Honor states that the Honor Magic 6 Pro 5G is the first smartphone to receive five DXOMARK Gold labels for its rear and selfie cameras, battery performance, display, and audio experience.

The Honor Magic 6 Pro houses a 5,600mAh battery with support for 80W wired charging and 66W wireless charging. The battery, which is backed by Honor's E1 power enhancement chip, is said to ensure extended usage even in low-temperature environments. The fast charging features are claimed to fill the battery from zero to full in just 40 minutes.

DELL LATITUDE 7455 COPILOT+ AI PC WITH SNAPDRAGON X-SERIES CHIPS LAUNCHED IN INDIA

Dell Latitude 7455 was launched in India on Thursday. The laptop supports Copilot+ features on Windows 11 and is powered by Qualcomm's latest Arm processors — the Snapdragon X Elite and Snapdragon X Plus. The laptop supports AI features like Cocreator and Live Captions that are touted to improve user productivity. The laptop is claimed to offer a local video playback time of up to 22 hours. It flaunts an aluminium chassis and comes with up to 32GB of RAM and up to 1TB of onboard storage.

Dell Latitude 7455 Price in India

Dell Latitude 7455 price in India starts at Rs. 1,49,990

and is currently available for purchase in the country via the Dell India website.

The laptop is offered in a Titan Grey shade and should also be available for purchase via e-commerce websites and retail stores across the country.

Dell Latitude 7455

Specifications, Features

The newly launched Dell Latitude 7455 sports a 14-inch Quad-HD+ (2,560 x 1,600 pixels) IPS touchscreen anti-glare display with a 16:10 aspect ratio, 400nits of peak brightness and ComfortView Plus Low Blue Light

certification. The laptop is offered in two processor variants — Snapdragon X Elite and Snapdragon X Plus, paired with an Adreno 740 GPU. It is available with up to 32GB of LPDDR5x RAM and up to 1TB of SSD storage.

The laptop offers support for Copilot+ AI features and the neural processing unit (NPU) is said to increase the overall efficiency of the laptop which features AI-backed functionality. Users can employ Cocreator to generate AI images from prompts, or use Live Captions to translate live or pre-recorded audio from a list of 44 languages to English. The Windows Studio effects can also help users adjust lighting or filters during a

video call.

The Dell Latitude 7455 is equipped with a Full-HD IR camera, quad speakers with Qualcomm Aqstic Speaker Max technology and Neural Noise Cancellation that is claimed to improve the video calling experience. The laptop packs a 54Wh battery that can be charged using a 65W AC adapter over a USB Type-C port.

Other connectivity options for the Dell Latitude 7455 include Wi-Fi 7, 5G, and Bluetooth 5.4. The laptop is equipped with two USB Type-C USB 4.0 ports, one USB 3.2 Gen 1 port, one universal audio jack and one microSD card reader. It measures 314 x 16.9 x 223.75mm in size and weighs 1.44kg.

GOOGLE CHROME FOR DESKTOP IS GETTING CIRCLE TO SEARCH-LIKE VISUAL LOOKUP FUNCTIONALITY VIA LENS

Google Chrome may be getting a new search feature that works similarly to 'Circle to Search' — the visual lookup tool powered by artificial intelligence (AI) which Google introduced in January, according to a report. The feature is said to be integrated into Google Lens and can be accessed via a beta version of Google Chrome on desktops and Chromebooks. Notably, Circle to Search was also recently introduced on iOS devices via a shortcut.

Google Lens' Drag to Search According to a report by 9to5Google, Google has introduced a new functionality, dubbed 'drag to search' on Chrome 127 and 128 beta versions for desktops and Chromebooks. It appears in the form of a Google Lens icon alongside the bookmarks option in the address bar.

To activate this feature, users can simply click on the icon and a new window appears, stating that users can "search anything on this page with

Google Lens". Subsequently, a custom selection window pops up which can be dragged to search for anything on the web page. The feature's user interface (UI) is similar to the one on the Android platform, with a shimmering appearance on the borders of the selection window.

According to Google, when a user accesses Google Lens' new functionality, a screenshot of that page is sent to the company. Gadgets 360 staff members were able

to verify the new drag-to-search functionality in Google Chrome 128 beta on Windows. Since it is only available in a beta version of the web browser, the feature is experimental.

This feature was first reportedly leaked by X (formerly Twitter) user @Leopeva64 via a series of posts in May. At the time, the user speculated to be an AI-powered lookup feature similar to Circle to Search and could improve upon the existing functionality of

Google Lens.

In recent months, Google has been said to be developing several new features for its web browser. A report suggested that Google Chrome on Android could soon read aloud web pages in the background, via a feature dubbed 'Listen to this Page'. The web browser also added new actions and more features on both Android and iOS platforms in a bid to provide an improved search experience to users.

WINDOWS 11 INSIDERS GET ACCESS TO QUICK MACHINE RECOVERY TOOL THAT TACKLES CROWDSTRIKE-LIKE INCIDENTS

Microsoft recently began testing a new tool designed to help Windows 11 PCs recover from boot failure. The new Quick Machine Recovery (QMR) feature that is rolling out to testers is designed to automatically attempt to repair boot-up problems on a Windows 11 PC, and could prevent a recurrence of last year's catastrophic CrowdStrike incident. Microsoft says that it will be able to remotely issue fixes for PCs facing critical boot-up issues, via Windows Update, while IT administrators in an organisation will be able to do the same for managed computers. How Microsoft's Quick Machine Recovery (QMR)

Tool Works
The Redmond company states that the new QMR tool is rolling out with build 26120.3653 to Windows Insiders testers. QMR is part of the Windows Resiliency Initiative that was unveiled by

Microsoft CEO Satya Nadella at last year's Ignite event. Users who have updated to this version will have access to the new functionality, which can automatically repair an unbootable PC. According to Microsoft, once

QMR is available on Windows 11, a PC that is unable to boot will be sent to the Windows Recovery Environment (WinRE). Microsoft will then connect the device with its recovery services and identify the reason for the boot failure. This process takes place without any user intervention, aside from selecting the QMR option in the WinRE menu. Once the issue has been identified, Microsoft will be able to send a targeted fix that resolves the problem and enables the PC to boot normally again. The remediation takes place in WinRE, and the fixes are delivered using Windows Update. Microsoft also says that while

QMR will be enabled for Windows 11 Home users by default, IT administrators will be able to enable or disable the feature on computers in their organisation. The feature will eventually be available on PCs running Windows 11 24H2 or newer, according to Microsoft. The QMR feature on Windows 11 could help organisations prevent a major outage like the one caused by CrowdStrike last year. Computers that are left in an unbootable state can receive software fixes that can restore functionality without manual intervention, which could help IT administrators bring computers online faster in case of a widespread outage.

COOLER MASTER SHARK X PC WITH AMD RYZEN 9 SOC, GEFORCE RTX 5080 GPU LAUNCHED IN INDIA

Cooler Master Shark X PC was launched in India on Monday. The PC components manufacturer collaborated with EliteHubs, a high-performance gaming hardware and peripherals company which hosted a Shark X Gaming Tournament at its flagship Mumbai Store on March 23 to commemorate the launch. The Cooler Master Shark X PC is introduced as a luxury machine for gamers and content creators, powered by up to AMD Ryzen 9 9900X processor and up to Asus Prime GeForce RTX 5080 GPU.

Cooler Master Shark X PC Price in India
Cooler Master Shark X PC price in India starts at Rs. 5,33,439 for the Shark X I. Meanwhile, the Shark X II and the Shark X III PCs are priced

at Rs. 5,85,741 and Rs. 6,64,293, respectively. They are available to purchase exclusively at EliteHubs' website and offline stores. Buyers can customise the PC with a different CPU,

GPU, RAM, or other components based on their preference. Cooler Master Shark X PC Specifications
EliteHubs Shark X III, which is the top-of-the-line model, is powered by an AMD Ryzen 9 9900X processor, paired with the Asus Prime GeForce RTX 5080 16GB Nvidia GPU. It comes with an Adata XPG Lancer RGB DDR5 64GB RAM operating at 6000MHz and a Kingston NV3 2TB M.2 NVMe SSD. These components are affixed on the Asus ROG Strix X870-I Gaming Wifi motherboard and housed in the Cooler

Master Shark X case. The latter features ARGB lighting from its tail to its head which can be customised. Cooler Master says the case's entire body can function as a Wi-Fi antenna. It is designed to support a 120mm AIO cooler for the CPU. For maintaining the thermal efficiency, it gets a customised CoolerMaster Atmos Liquid Cooler along with a Sickleflow 120 fan. The PC is powered by a Cooler Master V850 Gold SFX ATX 3.1 inbuilt PSU. The Shark X PC also comes with a Cooler Master 400MM PCIE 4.0 X16 Riser cable.

ACER TRAVELLITE LAPTOPS REFRESHED WITH 15-INCH DISPLAY, UP TO 13TH GEN INTEL CORE I7 PROCESSORS

Acer on Thursday refreshed its TravelLite business laptop lineup in India, with up to 13th Gen Intel Core i7 processors and up to 16GB of RAM. These laptops run on Windows 11 Home edition and sport a 15-inch Full HD LCD screen. The new Acer TravelLite (2025) laptops are equipped with a 3-cell 55.2Wh battery, that is claimed to offer up to 14 hours of battery life on a single charge. They feature a spill-resistant keyboard, and offer support for Wi-Fi 6 connectivity. Acer TravelLite (2025) Laptop Price in India
In India, the Acer TravelLite

(2025) is priced at Rs. 39,490 for the base model, with a 13th Gen Intel Core i3 CPU and 8GB of RAM. The laptop is also available in another variant, with a 13th Gen Intel Core i5 CPU and 16GB of RAM, that costs Rs.

58,990. According to the company, the Acer TravelLite (2025) will also be available in a third variant with a 13th Gen Intel Core i7 chip, but it has yet to reveal how much it will cost. The laptops are available in a

Silver colourway and will be available for purchase via the company's website. Acer TravelLite (2025) Laptop Specifications, Features
The Acer TravelLite (2025) runs on Windows 11 Home out-of-the-box. The laptop sports a 15.6-inch Full HD (1,920x1,080 pixels) IPS LCD screen with a peak brightness of 250nits. According to the company's website, the laptops are equipped with up to Intel Core i7 150U CPUs, paired with up to 64GB of RAM. You get up to 2TB of SSD storage on the Acer TravelLite (2025), and the laptops are equipped with stereo

speakers. Connectivity options include Wi-Fi 6, Bluetooth 5.2, a USB 3.2 Gen 2 Type-C port, a USB Type-C port, three USB 3.2 Type-A ports, an HDMI 2.0 port, and a 3.5mm audio jack. Acer has equipped the TravelLite (2025) laptops with a backlit keyboard, and a 3-cell 54.3Wh Li-ion battery that can be charged at 65W. The company says the laptop can offer up to 14 hours of battery on a single charge. All three models have a MIL-STD 810H durability certification. They measure 357.4x226x18.3 and weigh 1.58kg.

SONY SET TO RELEASE PS VR2 STEAM APP NEXT MONTH, BRINGING SUPPORT FOR PC VR GAMES

Sony has been testing PC games support for the PlayStation VR2 to expand the library of VR titles available on the headset this year. The PlayStation parent had announced last month that it would roll out PC support for PS VR2 on August 7.

A PS VR2 application has now surfaced on Steam and will bring access to PC VR titles on the platform when it launches next month. The PlayStation VR2 Steam app, which will let players experience virtual reality titles and apps available on Valve's storefront, is coming on August 6.

[PS VR2 Steam app](#)

According to the Steam page

for the app, players will be able to set up their PS VR2 headset on their PCs and access the library of VR titles and apps on Steam. The app will also allow players to update the firmware for the PS VR2 headset and PS VR2 Sense controllers.

Additionally, players will be able to adjust PS VR2 settings from the SteamVR dashboard, including defining the play area for the headset and adjusting screen brightness.

The access the PS VR2 Steam app, players will need

the PS VR2 headset, PS VR2 Sense controllers and the PS VR2 PC adapter.

The PlayStation VR2 PC adapter will be available for an estimated retail price of \$59.99 (roughly Rs. 5,000) at select retail stores and [direct.playstation.com](#) in supported regions.

Additionally, players would also need a DisplayPort cable compatible with DisplayPort 1.4, an active Steam account and a PC that meets minimum requirements.

Last month, Sony had announced that it would be rolling out support for PC VR games for PS VR2 on August 7. The company had confirmed that players would be able to access Steam's VR

library, including games like Half-Life: Alyx, Fallout 4 VR and War Thunder.

[PS VR2 cutbacks](#)

The PS VR2 was launched in February 2023 and has since struggled to attract players with its limited games library and incompatibility with PS VR titles. While Sony has continued to release new VR titles for PS VR2, a report last month claimed that the company was making "deep cuts" to funding for VR titles.

Earlier this year in February, Sony shut down its London Studio, the developer behind PlayStation VR Worlds, and made cuts at Horizon: Call of the Mountain developer Firesprite.

LENOVO THINKBOOK "CODENAME FLIP" AI PC CONCEPT WITH A FOLDABLE DISPLAY SHOWCASED AT MWC 2025

Lenovo on Sunday showcased its latest portfolio of artificial intelligence (AI)-powered devices at the Mobile World Congress (MWC) 2025 in Barcelona. Among the highlights was the ThinkBook "Codename Flip" AI PC concept. It sports an outward folding OLED display which enables users to choose between five different modes, including a Clamshell Mode for traditional tasks.

The concept device also integrates Workspace Split Screen functionality along

with AI-enhanced multitasking.

Lenovo shared details about its new concept device in a newsroom post. The company says its ThinkBook "Codename Flip" AI PC concept gives a glimpse into the future of versatile, AI-powered hybrid work environments. It is equipped with an 18.1-inch outward folding OLED display which can expand vertically to transition from the traditional compact 13-inch laptop form factor. Taking advantage of its

variable design, users can select between Clamshell Mode for traditional laptop tasks, Vertical Mode for document reviews, Share Mode for dual-display collaborations, Tablet Mode for creative workflows, and Read Mode for distraction-free reading.

It is equipped with an Intel Core Ultra 7 processor, which is paired with 32GB of LPDDR5X RAM. Other specifications weren't revealed. The laptop comes with Workspace Split Screen

functionality, which the company claims, eliminates the need of using external monitors and enables users to run multiple applications side-by-side.

The Lenovo ThinkBook "Codename Flip" AI PC features a Smart ForcePad with a 3-layer illuminated dashboard which adds numeric keys and media controls. For connectivity and security, the laptop boasts Thunderbolt 4 ports and a fingerprint scanner, respectively.

However, the company did not share information about the concept device's production, availability, or pricing. It is important to note that while concept devices give a glimpse of the technologies companies are developing for the present as well as the future, not all of them make it to the production stages. Thus, the showcased Lenovo ThinkBook "Codename Flip" AI PC concept may or may not be launched in the near future.

VIVO X200 LEAKED DUMMY UNIT SHOWS DESIGN; VIVO X200 PRO BATTERY DETAILS SURFACE ONLINE

Vivo X200 series is expected to launch as the successor to the Vivo X100 lineup. Although the Vivo X100 and X100 Pro debuted in India in January this year, the phones were initially unveiled in China in November 2023 and were introduced globally in December. The company has yet to confirm the upcoming handsets or their launch timeline, but details about the Vivo X200 phones have recently been doing rounds of the rumour mill. A new leak shows the purported design of a leaked Vivo X200 dummy unit, while another tipster has suggested the battery specifications of the Vivo

X200 Pro. Vivo X200 Design, Features (Expected) A dummy unit of the Vivo X200 was shared in a Weibo post by tipster Experience More (translated from

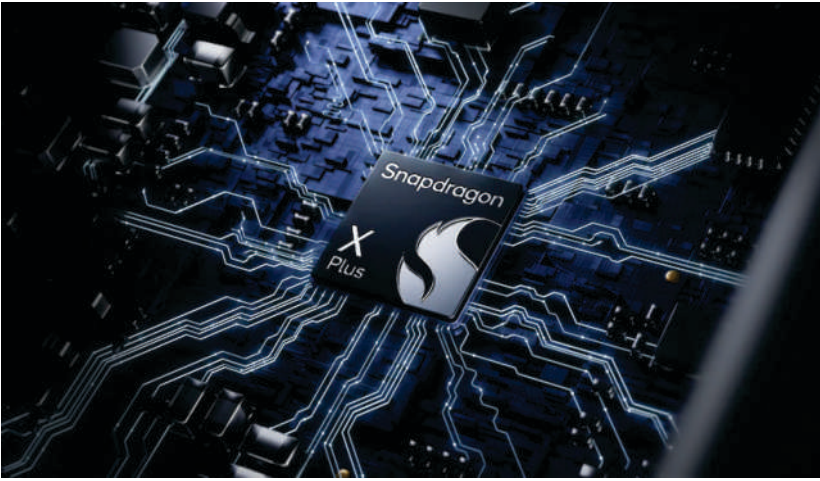

Chinese). The rear camera module is seen within a centrally placed circular module surrounded by a silver ring. The Vivo X200 also appears to have a slightly curved

display with very slim uniform bezels. The front camera position is seen in a centred hole-punch slot at the top of the panel. The bottom edge shows a speaker grille, a USB Type-C port, alongside a mic and a SIM tray slot. Earlier leaks claim that the Vivo X200 could carry a 50-megapixel customised Sony main camera, a 3x mid-range telephoto lens and a 1.5K display. Vivo X200 Pro Battery, Other Features (Expected) Another tipster Digital Chat Station (translated from Chinese) claimed in a Weibo post that the Vivo X200 Pro may feature a battery with a

capacity larger than 6,000mAh. To mitigate concerns about the phone's weight and thickness due to a large battery, the company may use fibreglass material for the body, similar to what is used in the Vivo X Fold 3 series handsets, the tipster added. Previous leaks by the same tipster suggest that the Vivo X200 Pro may come with a MediaTek Dimensity 9400 chipset, an ultrasonic in-display fingerprint sensor and a triple rear camera unit including a periscope lens. The phone is also tipped to get a 6.7 or 6.8-inch slightly curved 1.5K display.

QUALCOMM REPORTEDLY PLANS TO ANNOUNCE NEW SNAPDRAGON X SERIES CHIPSETS IN SEPTEMBER

Qualcomm might announce new Snapdragon X series chipsets next month, according to a report. The chipmaker introduced its Snapdragon X series processors in April, and currently, it is the only chipset available for consumer laptops that meets the specifications required for Copilot+ PCs. This is because the dedicated Hexagon neural processing unit (NPU) in the chipset is said to capable of 45 trillion operations per second (TOPS), and Microsoft qualifies laptops with at least 40 TOPS as Copilot+ PC. It is not known whether the new X series chips will beat the NPU performance of the

company's existing processors. New Snapdragon X Series Chipsets Could Debut Next Month At its Snapdragon India event held earlier this week, Qualcomm showcased the capabilities of its X series

chipsets and introduced the 5G-enabled Snapdragon 4s Gen 2 mobile platform. During the event, Kedar Kondap, Senior Vice President and General Manager, Compute and Gaming, Qualcomm hinted that more X series chipsets

might be announced in September. According to a report by FoneArena, Kondap might be alluding to the upcoming Internationale Funkausstellung (IFA) 2024 event in Berlin, which is a consumer electronics trade show. The chipmaker could reportedly introduce new variants of the Snapdragon X Plus and X Elite chips. The publication claims that while new chip models are unlikely, new stock-keeping units (SKUs) of existing processors could be unveiled. There are three existing SKUs for the Snapdragon X Elite — X1E-78-100, X1E-80-100, and X1E-84-100. Each

chip has minor performance and efficiency differences, while the cost of each chip also varies. As per the speculation, more SKUs in the Elite and Plus tier can be introduced at the Berlin event. Apart from this, the company is also expected to announce the new Snapdragon 8 Gen 4 mobile platform in its annual event in October. Qualcomm has revealed that the chipset will use its in-house Oryon CPU and will feature a dedicated NPU. An earlier report claimed that the chipset could feature a significant improvement in the Adreno 750 GPU's power efficiency, but may only get a single-digit CPU performance increase.

SOLAR SYSTEM'S JOURNEY THROUGH ORION COMPLEX MAY HAVE ALTERED EARTH'S CLIMATE

The movement of the solar system through the Orion star-forming complex around 14 million years ago may have influenced Earth's climate, according to scientists. This dense region of space, part of the Radcliffe Wave galactic structure, could have compressed the heliosphere—the protective shield surrounding the solar system—while increasing interstellar dust reaching Earth. Researchers suggest that this influx of cosmic dust might have left traces in geological records, potentially linking galactic

activity to past climate changes. Solar System's Passage Through the Radcliffe Wave According to the study published in Astronomy & Astrophysics, an international research team led by the University of Vienna used data from the European Space Agency's Gaia mission and spectroscopic observations to determine that the solar system moved through the Radcliffe Wave in the Orion constellation between 18.2 and 11.5 million years ago. The most probable period was estimated between 14.8

and 12.4 million years ago. João Alves, Professor of Astrophysics at the University of Vienna and co-author of the study, stated to Phys.org, that this research builds on prior findings regarding the Radcliffe Wave. This structure, made up of interconnected star-forming regions, includes the Orion complex, which the sun is believed to have passed through. Potential Impact on Earth's Climate The study suggests that the increased presence of interstellar dust may have influenced Earth's

atmosphere. Efrem Maconi, lead author and doctoral student at the University of Vienna, said that this dust might have contained traces of radioactive elements from supernovae, which could be detected in geological records using advanced technology in the future. The solar system's passage aligns with the Middle Miocene Climate Transition, a period marked by a shift from a warmer, variable climate to a cooler one, leading to the development of Antarctic ice sheets. Scientists highlight that while interstellar dust could have played a role, the

dominant factor in this climate change was a long-term decrease in atmospheric carbon dioxide levels. Not Comparable to Human-Induced Climate Change Maconi noted that while interstellar dust could have contributed to past climate shifts, the amount required for significant change would need to be much greater than current data suggests. The Middle Miocene Climate Transition unfolded over hundreds of thousands of years, unlike modern climate change, which is occurring rapidly due to human activities

PERSONAL COMPUTER TODAY

MONTHLY

Post Reg. No. RAJKOT-284-2024-2026, Published Date 5th of Every Month and Posting Date 10th of Every Month, Posted at RMS - RAJKOT, Valid Upto : 31-12-2026

ONE INDIA ONE CCTV SURVEILLANCE & IT NEWS MAGAZINE

ADVERTISE IN PERSONAL COMPUTER TODAY & EXPAND YOUR BUSINESS

WHAT WILL YOU FIND HERE ?

- ❖ New products and technology from top brands.
- ❖ Easy solutions with new technology.
- ❖ New opportunity to contact and do business with direct companies and distributors and also special offers

So don't wait any longer,
don't miss this opportunity,
