# ASIRT CELEBRATES 14 YEARS OF EXCELLENCE; FELICITATES ACPL 7 CHAMPIONS AND PARTNERS

**ASIRT**  
PARTNER PROGRESS EVOLVE

The Association of System Integrators and Retailers in Technology (ASIRT) marked a significant milestone—14 years of strengthening India's technology partner ecosystem—with a grand evening of celebration, recognition, and camaraderie. The event also honored participants of the highly successful ASIRT Cricket Premier League (ACPL) – Season 7, reaffirming ASIRT's commitment to community building beyond technology.

The evening commenced with a special felicitation ceremony recognizing team owners, captains, and sponsors whose contributions made ACPL 7 a resounding success. Enjoy, the Title Sponsor of ACPL 7, was specially honored for its continued, unwavering support in elevating the tournament's stature. One of the proudest moments of the evening was welcoming the ACPL 7 champions, AXISY, and runners-up, Mumbai Data Recovery, back on stage. Their achievements were met with enthusiastic applause as

members relived the tournament's thrilling highlights. A key highlight of the celebration was the ceremonial cake cutting marking ASIRT's 14th anniversary. The founders of ASIRT shared reflections on the association's journey—from its inception with a clear vision to its evolution into a strong, credible, and respected platform for system integrators and technology retailers. Their insights reinforced ASIRT's continued focus on collaboration, growth, and long-term value

creation for its members. Adding a dose of entertainment to the evening, a noted stand-up captivated the audience with his sharp mimicry, engaging storytelling, and impeccable comic timing. The celebrations concluded on a high note, with music and a lively DJ set, as members took to the dance floor, bringing the evening to a vibrant, energetic close. The event stood as a testament to ASIRT's 14-year journey and its enduring role in strengthening relationships, enabling collaboration, and fostering

growth within the technology partner ecosystem. The Association of System Integrators and Retailers in Technology (ASIRT) is a leading industry body dedicated to fostering collaboration, growth, and knowledge sharing among system integrators and technology retailers across India. For more information, visit [www.asirt.in](http://www.asirt.in)

## OPENAI SHARES NEW SAFEGUARD PLANS TO PROTECT TEENAGERS AND USERS FACING EMOTIONAL DISTRESS

OpenAI has shared plans to better protect ChatGPT users facing emotional distress, as well as teenagers interacting with its artificial intelligence (AI) models, on Tuesday. The San Francisco-based AI firm highlighted that it has started partnering with experts and including measures within the platform to assist and guide users in a sensitive moment. The company plans to make significant progress within the next 120 days. OpenAI highlighted that its reasoning-focused models, such as GPT-5 and o3, have been trained with a "deliberative alignment" technique, which allows it to consistently follow and apply safety guidelines. OpenAI Shares Plans to Make ChatGPT a Safer Experience In a blog post, the AI firm said that it is improving its large language models (LLMs) to

recognise and respond to signs of mental and emotional distress, which will be guided by the input of a team of experts. Notably, the announcement from OpenAI comes after ChatGPT was involved in two tragic incidents where people lost their lives. In the first incident, a teenager committed suicide after confiding in ChatGPT for months, and in the second, a 56-year-old man committed suicide after killing his mother.

These incidents have raised concerns about whether AI companies are doing enough to ensure that the chatbots do not encourage or agree with users who might be having an emotionally charged moment or have mental health issues. Acknowledging the situation, OpenAI said it has started taking steps in four key areas: Interventions for people in crisis, making it easier to reach emergency services and getting help from experts, enabling connections to

trusted contacts, and strengthening protections for teenagers. The AI giant said that it has started convening a council of experts in youth development, mental health, and human-computer interaction, who will help shape a "clear, evidence-based vision for how AI can support people's well-being and help them thrive." With their input, the company will design new safeguards, such as improved parental controls. The council will also advise OpenAI on product, research, and policy decisions. Alongside the experts, the council will also include a pool of more than 250 physicians who have practised in 60 countries. Calling them the company's Global Physician Network, OpenAI said these members have already worked with the company on its health bench evaluations. "Their input

directly informs our safety research, model training, and other interventions, helping us to quickly engage the right specialists when needed." Apart from this, the company also plans to use its real-time router (which was released with the launch of the GPT-5 models), to switch to a reasoning model whenever its system detects a sensitive conversation showing signs of acute distress. OpenAI is also planning to improve the parental controls of ChatGPT to ensure teenagers are better protected by next month. With this, parents will be able to link their account with their teen's account via a simple email invitation, control how the chatbot responds to teens, manage which features to disable, and receive notifications when the system detects their teen in a moment of distress.

## RAY-BAN META OPTICS STYLES LAUNCHED AS META'S FIRST PRESCRIPTION-FOCUSSED SMART GLASSES

Meta announced the expansion of its AI-powered smart glasses lineup with the launch of Ray-Ban Meta Optics Styles on Tuesday. The smart glasses are the optical-first styles from the company designed for prescription wearers. Developed in partnership with EssilorLuxottica, the new lineup marks a continuation of the companies' multi-year collaboration, following the earlier introduction of Ray-Ban Meta glasses, Oakley Meta Glasses, and Meta Ray-Ban Display models.

**Ray-Ban Meta Optics Styles Price, Availability**

The new lineup includes Ray-Ban Meta Blayzer Optics (Gen 2) and Ray-Ban Meta Scriber Optics (Gen 2). They are priced at \$499 (roughly Rs. 41,500). The glasses will be available for pre-order in the US starting March 31, with sales beginning April 14 across Ray-Ban stores, Ray-Ban.com, and select EssilorLuxottica retail outlets such as LensCrafters and Sunglass Hut.

As per Meta, the smart glasses will also be sold across multiple global markets, including the UK,

Canada, Australia, Europe, and the UAE. Expansion to countries like Brazil, Mexico, and India is expected later this year.

**Ray-Ban Meta Optics Styles Features, Specifications**

The new Ray-Ban Meta Optics Styles are designed with a focus on comfort and customisation, the company explained in a blog post. The frames feature a slimmer design, interchangeable nose pads, overextension hinges with an additional 10-degree rotation, and adjustable temple tips for a more personalised fit.

Both Blayzer Optics and Scriber Optics frames support a wide range of lenses, including single-vision, progressive, and

Transitions lenses. According to Meta, this means users can switch between indoor and outdoor environments without changing frames.

On the performance front, the Ray-Ban Meta Optics Styles retain core smart features seen in earlier models. They are equipped with a 12-megapixel camera, which can capture photos and record videos in 3K resolution. There is also a six-microphone system for improved audio recording and clearer calls. Users can listen to music and podcasts via platforms like Spotify and Amazon Music, take calls, send messages, and interact with Meta AI using voice commands.

A new dedicated action button allows quick access to

Meta AI and enables users to capture content or trigger shortcuts instantly. The AI assistant can understand context, respond to queries, and assist with tasks based on what users see.

In addition to the new Ray-Ban Meta Optics Styles, the company is introducing new seasonal colour options, including Shiny Transparent Grey (Wayfarer), Shiny Transparent Peach (Skyler), and Matte Transparent Peach (Headliner) for Ray-Ban Meta (Gen 2). New colour and lens combinations are also being rolled out for Oakley Meta models, including support for Prizm Transitions lenses for adaptive lighting conditions.

**New Meta AI Features**  
Meta says it is continuing to expand AI capabilities across its smart glasses lineup with upcoming software updates. It is introducing a new nutrition tracking feature that will allow users to log meals using voice prompts or photos. Meta AI can extract key details and offer personalised insights over time.

Support for hands-free WhatsApp summaries is also in the rollout stage. As the

name suggests, the feature enables users to ask Meta AI for quick recaps of conversations or specific details. The company says processing is handled on-device and is protected by end-to-end encryption.

Other upcoming features include Neural Handwriting, which allows users to write messages using finger gestures on surfaces, and display recording, which can combine in-lens visuals, real-world footage, and audio into shareable videos. Meta is also expanding pedestrian navigation across US cities, offering turn-by-turn directions directly in the user's field of view.

The aforementioned features will be available on various Ray-Ban Meta smart glasses in the coming months.

*Technology is important because it creates the future. We're able to be a part of the 'next' and create things that don't exist.*

*- M. C. Hammer*

# ACER TRAVELLITE ESSENTIAL SERIES WITH 14" DISPLAY, AMD & INTEL CPU OPTIONS LAUNCHED

Nvidia is now rolling out a major update to its Deep Learning Super Sampling (DLSS) 4.5. The new update brings a 6X multi-frame generation feature, which creates multiple AI-powered frames for every natively rendered frame. Additionally, a separate dynamic multi-frame generation capability has also been added that helps supported games reach target frames when being played at a higher refresh rate. Interestingly, the update comes ahead of Nvidia's planned release of DLSS 5, which has received mixed feedback from consumers after the preview video was released.

Nvidia Releases DLSS 4.5 Update

In a newsroom post, the tech giant announced the release of the new DLSS 4.5 update, which is now rolling out to the Nvidia app beta. The biggest improvement in the update is the improvement to the multi-frame generation capability. Unlike the previous generation's 4X multiplier, it can now generate 6X frames.

This means the feature generates five additional AI-powered frames for every natively rendered one on the GeForce RTX 50 Series GPUs. The company says it increases 4K frame rates in path-traced titles by up to 35 percent, while creating minimal impact to responsiveness. This, the

company says, will let users make the most out of their 4K 240Hz OLED gaming displays.

Another feature, the dynamic multi-frame generation, is aimed at adding extra frames while the user plays a high refresh rate game. So, when users are playing games at 120Hz, 144Hz, 240Hz, or higher refresh rates, the feature will generate the missing frames to hit the target frames. Nvidia says this will bring parity between image quality and responsiveness.

Coming with the update is also a new DLSS frame generation model that improves in-game user interfaces by incorporating additional game engine data.

This is currently only available in select titles. This is said to bring quality improvements to mini maps, on-screen user interface elements, and other areas with the Nvidia GeForce RTX 40 Series and 50 Series GPUs.

Currently, some of the games that support these features include Battlefield 6, Borderlands 4, Dragon Age: The Veilguard, EA Sports F1 25, God of War: Ragnarök, Hogwarts Legacy, Indiana Jones and the Great Circle, Marvel's Spider-Man 2, Monster Hunter Wilds, Star Wars Outlaws, The Elder Scrolls IV: Oblivion Remastered, and The Outer Worlds 2.

# GOOGLE AI PRO PLAN UPGRADED WITH 5TB CLOUD STORAGE ACROSS DRIVE, PHOTOS APPS AT NO ADDITIONAL COST

Google on Thursday announced that it is upgrading the benefits of its Google AI Pro subscription plan. Subscribers enrolled in the plan will now enjoy higher bundled cloud storage at no additional cost, the company said. The update is now rolling out to users and significantly enhances the value of the AI-focused subscription, which already includes access to Google's latest artificial intelligence (AI) tools along with cloud storage benefits across its ecosystem.

More Cloud Storage With Google AI Pro

With the latest update, subscribers to the Google AI Pro plan will now receive 5TB of cloud storage, up from the previous 2TB limit. The update was announced by

Google One head Shimrit Ben-Yair in a post on X. This expanded storage can be used across Google services like Google Drive, Gmail, and Google Photos.

The increased cloud space is expected to benefit users with a huge volume of content on their phones, including

videos, images, and documents.

The increase, notably, comes at no extra charge, meaning the plan continues to be priced at Rs. 1,950 per month or Rs. 19,500 per year in India. The added storage is expected to benefit users working with large AI-

generated content such as videos, images, and documents, which can quickly consume storage space.

Gadgets 360 staff can confirm that the expanded cloud storage is now reflected in Google Drive, Photos, and other Google services. It is available to both paid subscribers as well as those who are enrolled via the Google Student Offer and Jio's complimentary AI Pro subscription.

Google AI Pro Plan Benefits, Features

Google's AI Pro plan provides access to the Gemini and Deep Research on Gemini AI models. Subscribers can utilise video generation with the help of the tech giant's latest Veo video generation model, along with an

increased limit for creating images to videos with Veo 2 in Whisk. As per the company, it will also grant limited access to Veo 3 Fast on VertexAI.

Students also get 1,000 monthly AI credits, which can be used to fulfil text, image, and video generation queries across the Flow and Whisk platforms. Google says it also offers up to five times higher limits for creating Audio Overviews, notebooks, and more in NotebookLM. Along with this, you also get access to Gemini in Google's suite of apps, such as Docs, Sheets, and Slides.

Apart from the AI features, the Google AI Pro plan now also includes 5TB of cloud storage across Google Drive, Gmail, and Google Photos, up from the previous 2TB limit.

# CRITICAL INFRA HONEYWELL CCTVS VULNERABLE TO AUTH BYPASS FLAW

The U.S. Cybersecurity and Infrastructure Security Agency (CISA) is warning of a critical vulnerability in multiple Honeywell CCTV products that allows unauthorized access to feeds or account hijacking.

Discovered by researcher Souvik Kanda and tracked as CVE-2026-1670, the security issue is classified as "missing authentication for critical function," and received a critical severity score of 9.8.

The flaw allows an unauthenticated attacker to change the recovery email

address associated with a device account, enabling account takeover and unauthorized access to camera feeds.

"The affected product is vulnerable to an unauthenticated API endpoint exposure, which may allow an attacker to remotely change the "forgot password" recovery email address," CISA says.

According to the security advisory, CVE-2026-1670 impacts the following models:

- ◆ I-HIB2PI-UL 2MP IP 6.1.22.1216

- ◆ SMB NDAA MVO-3
- ◆ WDR\_2MP\_32M\_PTZ\_v2.0
- ◆ PTZ WDR 2MP 32M
- ◆ WDR\_2MP\_32M\_PTZ\_v2.0
- ◆ 25M IPC WDR\_2MP\_32M PTZ\_v2.0

Honeywell is a major global supplier of security and video surveillance equipment with a broad range of CCTV camera models and related products deployed in commercial, industrial, and critical infrastructure settings worldwide.

The company offers many NDAA-compliant cameras that are suitable for deployment in U.S. government agencies and federal contractors.

The specific model families named in CISA's advisory are mid-level video surveillance products used in small to medium business environments, offices, and warehouses, some of which may be part of critical facilities.

CISA stated that as of February 17th there were no known reports of public

exploitation specifically targeting this vulnerability.

Nonetheless, the agency recommends minimizing network exposure of control system devices, isolating them behind firewalls, and using secure remote access methods such as updated VPN solutions when remote connectivity is necessary.

Honeywell has not published an advisory on CVE-2026-1670, but users are advised to contact the company's support team for patch guidance.

# HIKVISION GAMING STORAGE SERIES: ENGINEERED TO ELEVATE GAME PERFORMANCE

**Consumer PCIe 4.0 NVMe M.2 SSD**  
**G4000**  
High-Performance Storage for PCs and Workstation

- Up To 7450MB/s
- Excellent Thermal Control
- Low Latency

**Consumer PCIe 4.0 NVMe M.2 SSD**  
**G4000E**  
Not Only High Performance With New Technology

- Up To 5100MB/s
- Excellent Thermal Control
- Lower Power Consumption

**INTELLIGENT STORAGE**

**U100 DDR4 RGB**  
Made for Overclocking

- High Bandwidth
- High Capacity
- RGB Light
- Free Overclocking

The HIKVISION Gaming Storage Series provides specialized storage and memory products designed to meet the demanding needs of today's gamers. The series includes the G4000E PCIe 4.0 SSD, G4000 PCIe 4.0 SSD, and U100 RGB DDR4. Each product is engineered to deliver superior speed, effective cooling, and visual customization.

**G4000 SSD Delivers Elite**

### Level Speed

Built for high intensity gaming and content creation, the G4000 SSD achieves read speeds of up to 7450 MB/s via PCIe 4.0. Available in capacities up to 2TB, it ensures quick load times and smooth operation. The product is supported by an efficient thermal management system that prevents overheating.

**G4000E SSD Balances**

### HIKVISION

#### Speed with Reliability

The G4000E SSD utilizes PCIe 4.0 technology to deliver sequential read speeds of up to 5100 MB/s and offers storage capacities of up to 2TB. Its advanced heat dissipation design maintains stable performance over extended gaming sessions, providing a dependable storage option

for everyday gaming.

#### U100 RGB DDR4 Combines Style and Performance

The U100 RGB DDR4 features dynamic RGB lighting and supports speeds of up to 3200MHz. Designed for easy overclocking, it offers both visual customization and consistent high frequency performance. This makes it ideal for gamers who value aesthetics and speed.

Each product in the series

focuses on enhancing the gaming experience. The G4000E SSD, G4000 SSD, and U100 DDR4 are all developed with an emphasis on real world gaming scenarios and long term reliability. The HIKVISION Gaming Storage Series is designed to empower gamers globally, delivering enhanced performance and reliability through trusted official channels and partner networks.

## APPLE UPDATES MACBOOK SHOPPING FLOW WITH ABILITY TO CONFIGURE CHIP, DISPLAY SIZE AND MORE

Apple has silently updated its online store to simplify the process of buying a Mac. The change is aimed at reducing complexity during checkout by eliminating the complexity of Mac configurations that users face during the buying process. The updated Apple Store website now guides them through their Mac or MacBook purchases in a step-by-step manner, similar to how iPhone and iPad models are currently sold on the online store.

Mac Purchases Simplified

Up until now, the traditional

process of buying a Mac involved navigating through multiple configuration options, such as processor, memory, storage, and, on a single page. For buyers who were not technically very proficient, it made a simple purchase highly complex. The Cupertino-based tech giant has now designed the Mac purchase flow to prioritise simplicity (via MacWorld). Instead of presenting all configuration options at once, the updated interface allows customers to first select a base model. After

that, they can choose the colour, processor variant, and power option. The subsequent customisation options include the amount of unified memory, SSD storage, the type of stand, and Ethernet capabilities.

The updated Apple Store interface also presents compatible accessories, like the Magic Keyboard and Magic Mouse. Creators who use Apple's suite of apps can bundle Final Cut Pro and Logic Pro licenses via the page, and it will come pre-installed on their Mac.

As users move through each step, the prices update dynamically to reflect how the selected upgrades affect the final cost of the Mac. This eliminates the need to compare different configurations and their prices manually.

The rest of the checkout process remains the same. Customers are still shown an estimated time of delivery and pick-up options before the payment, enabling them to receive their purchase at their convenience. Apple's updated approach mirrors the

iPhone and iPad buying process, where users can simply select a model, colour, and storage capacity, before checkout.

If customers require help with their purchase, they can avail of Apple's 'Shop with a Specialist over Video' services. It connects them with knowledgeable Apple Specialists over a video call to get personalised buying recommendations, compare different product models, see available purchase options, and learn more about Apple devices.

## ACER TRAVELLITE ESSENTIAL SERIES WITH 14" DISPLAY, AMD & INTEL CPU OPTIONS LAUNCHED

Acer has introduced its TravelLite Essential series laptops in India. The lineup features a durable aluminium build and comes with CPU options from both Intel Core and AMD Ryzen. The Acer TravelLite Essential laptops sport a 14-inch display with an 82 percent screen to body ratio and a 180-degree hinge, allowing flexible viewing angles. They are equipped with a 36Whr battery, which is claimed to offer up to eight hours of usage on a single

charge.

Acer TravelLite Essential Series Price in India Pricing for the Acer TravelLite Essential series starts at Rs. 32,999 for the base variant. It comes in a single Obsidian Black finish and will be available for purchase via Acer's exclusive stores, Acer authorised resellers, and Acer online store.

Acer TravelLite Essential Series Specifications

The company says that the Acer TravelLite Essential

series is available with an Intel's 13th Gen Core i5-1334U or an AMD Ryzen 5 7430U, and both models are equipped with integrated graphics. They ship with Windows 11 Home and feature a 14-inch Full-HD (1,080×1,920 pixels) IPS anti-glare display. The screen offers an 82 percent screen-to-body ratio, 250 nits of peak brightness, and a 180-degree hinge.

For video calls, the Acer TravelLite Essential series is

equipped with an HD webcam and a built-in privacy shutter. You get up to 1TB PCIe SSD storage and up to 32GB DDR4 RAM.

The lineup has dual stereo speakers as well. For connectivity, the laptops feature Bluetooth 5.2, Wi-Fi 6, HDMI 1.4, USB 3.2 Type-A and Type-C ports, RJ45 LAN, MicroSD card reader, and a 2-in-1 audio combo jack.

The Acer TravelLite Essential series houses a 36Wh three-cell Li-ion battery with support

for fast charging. They are advertised to deliver up to eight hours of battery life on a single charge. The laptops boast an aluminium finish along with a lightweight build that makes them easy to carry.

The laptops are equipped with a spill-resistant keyboard and has a trusted platform module (TPM) 2.0 for enhanced data protection. The laptops have a metal chassis and weigh around 1.34 kg.

# PRAMA PREMIERES LATEST SECURITY TECHNOLOGIES AND SMART CITY SOLUTIONS AT CONVERGENCE INDIA EXPO

Prama India participated in the 33rd edition of the 'Convergence India Expo' event to present the latest Security Technologies and Smart City and Safe City solutions. The event was organised from 23-25 March at Bharat Mandapam, New Delhi. The Prama India booth at 'Convergence India Expo' received an overwhelming response from industry leaders, tech innovators, entrepreneurs, and end users from the IT, Telecom, IoT, Start-ups, Fintech, and AI ecosystems.

Prama India management spokesperson said, "PRAMA

has marked its presence by presenting its latest innovations at the Convergence India Expo. PRAMA showcased the cutting-edge technologies and latest security solutions. This event is a very relevant platform to showcase Smart City Mission and Safe City solutions. PRAMA presented the latest technologies, bespoke products and 'Made-in-India' solutions for securing the Indian cities."

Prama India's booth at 'Convergence India Expo' was one of the key attractions for the visitors. It showcased the latest products and

solutions, including Safe City Solution, Smart Retail Solution, Smart Education Solution, AIsense Technology, Network and Transmission, Mobile Enforcement, and ADAS.

At the concurrent conference at 'Convergence India Expo', the agenda covered 12 diverse themes, featuring eminent speakers across varied technology streams. In a panel discussion, A.L. Narasimhan, Vice President, Strategic Business Alliances, Prama India Private Limited, shared his insights on the 'Internet of Things (IoT) - Building Scalable & Resilient IoT Infrastructure'. During this session at the conference, A.L. Narasimhan introduced PRAMA as a premier Made-in-India brand. He elaborated the video security-based IoT

solutions provided by PRAMA across verticals.

Prama India representative, Prashant Hegde, Vertical Head- PPOGM, Heavy Industries & Transportation, Prama India Private Limited, participated in a panel discussion on the theme 'AI, Edge & Automation: Transforming IoT system intelligence'. Convergence India Expo concluded with three days of immersive tech, innovation and global collaboration.

About Prama India

Founded on the core belief to put India on the global map for video security products, PRAMA is India's largest and one of the first companies truly representing the motto of 'Atmanirbhar Bharat'. The indigenous brand, PRAMA celebrates the maxim of

'Made for India, Made by India and Made in India' and manufactures high quality video security products catering to all the security needs.

Encouraged by the Indian government's 'Make-in-India' initiative, Prama India has established India's first world-class manufacturing facility to help transform India into a global manufacturing and export hub for video security products. The company has a commitment to empower India through indigenous manufacturing of video security products. Its R&D Centre has been developed keeping in mind the ever-changing technology and advancements to innovate and update the hardware and software solutions.

## SLACK UPGRADES SLACKBOT WITH NEW AI FEATURES TO TURN IT INTO AN ENTERPRISE AGENT

Slack is bringing more than 30 new artificial intelligence (AI) features to Slackbot. The new capabilities for the Salesforce-owned platform's AI assistant are aimed at turning it into an AI agent for enterprise needs. Most of the new features take advantage of the existing apps inside Slack, which connect third-party enterprise tools and platforms with the workspace messaging platforms. Now with the agentic extension, Slackbot can perform complex work-related tasks autonomously on behalf of the user.

Slackbot Is Now an Enterprise Agent

In a newsroom post, Slack announced the new features that are coming to the platform. The features are similar to what Anthropic's Claude Copilot or Microsoft's Copilot Copilot offer, but with

the ecosystem benefits of Slack's connected apps and customer relationship management (CRM) systems.

Coming to the new features, Slackbot can now take notes in virtual meetings and share meeting transcriptions with the participants. But that's not all. It can also find relevant information across the connected apps and enterprise systems to

contextually surface actionable recommendations to users. The AI agent will work with the established permissions and governance built inside Slack.

The company is also bringing reusable AI skills to the Slackbot. With this, users will have to define a commonly repeating task a single time, and then run it automatically afterwards. Slackbot can recognise when a prompt

matches a skill and can apply it directly.

Another big inclusion is support for Anthropic's Model Context Protocol (MCP). This will allow Slackbot to connect to any agent via Agentforce or connected apps in the enterprise and complete tasks. The company says employees do not have to define the app, as the assistant can automatically find the right path based on the prompt.

The post also mentions that Slackbot comes with built-in customer management capabilities. With this, it can read channels, understand the context, and update the deals, contacts, and call notes. Small businesses can start with Slack and then scale up to Salesforce when they want, without having to migrate anything.

And for those enterprises that

already use the Salesforce platform, Slackbot can act as the unified conversational interface for different tools and services. It can research accounts, route cases, and trigger workflows via natural language commands, and users do not have to manually open any application. Additionally, later this year, every new Salesforce customer will already have Slack connected with all these capabilities, without any extra steps or configuration. Finally, new skills are coming to the Slackbot. The AI assistant is now equipped with deep research and voice input tools. Other new features include shareable prompts, and memory access that allows it to remember how a user works, their preferences and workflow. Slackbot then personalises its behaviour.

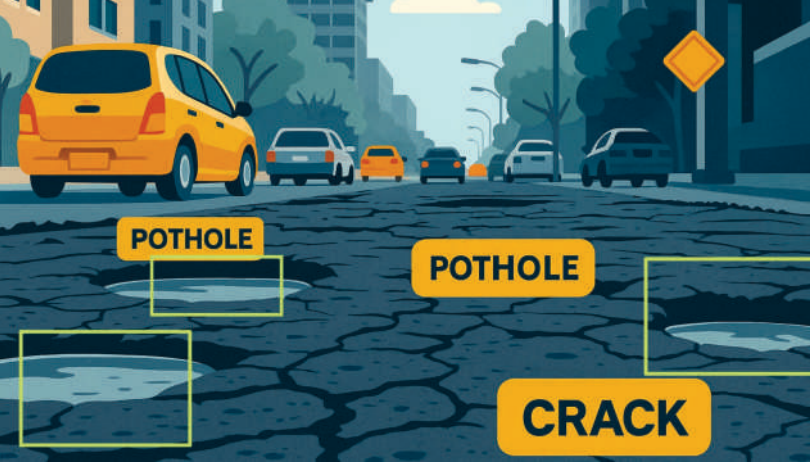

# દેશના વિવિધ હાઈવેની સ્થિતિનું મોનીટરીંગ હવે AI થી

હવે આપણા હાઈવે પરના ખાડા ખબડાવાળા રોડની વિગતો ડેશકેમેરાની મદદથી સેન્ટ્રલાઈઝડ સિસ્ટમમાં પહોંચશે

ભારતના વિવિધ હાઈવે પર હવે આર્ટિફિશિયલ ઇન્ટેલિજન્સ (એઆઈ)નો નવી રીતે ઉપયોગ કરવામાં આવશે. નેશનલ હાઈવે ઓથોરિટી ઓફ ઇન્ડિયા (એનએચએઆઈ) દેશભરના લગભગ ૪૦ હજાર કિલોમીટર લાંબા નેશનલ હાઈવે પર એક આધુનિક ડેશકેમ મોનીટરીંગ સિસ્ટમ લાગુ કરવાની તૈયારીમાં છે.

એક તરફ આપણા હાઈવે પર હવે ફાસ્ટેગ આધારિત ટોલટેક્સ કલેક્શનને વધુ આધુનિક બનાવવાની શરૂઆત થઈ ગઈ છે. ટોલ પ્લાઝા પર બેરિયરના અવરોધ વિના વાહનો અટકવા વિના ઝડપથી પસાર થઈ જાય, તેમ છતાં જરૂરી ટોલટેક્સ કપાઈ જાય એવી વ્યવસ્થા જુદા જુદા ટોલ પ્લાઝા પર લાગુ થવા લાગી છે.

બીજી તરફ આપણા નેશનલ હાઈવેના

મેઈન્ટેનન્સ તરફ પણ વધુ ધ્યાન આપવાનો પ્રયાસ કરવામાં આવી રહ્યો છે. આ માટે 'ડેશકેમ એનાલિટિક્સ સર્વિસિસ (ડીએએસ)' નામની નવી સિસ્ટમનો

ઉપયોગ થશે. તેમાં એઆઈ અને મશીન લર્નિંગ (એમએલ) બંને ટેકનોલોજીનો ઉપયોગ થશે. તેના ભાગરૂપે વિવિધ હાઈવે પર નિયમિત

રીતે પેટ્રોલિંગ કરતાં વાહનો પર હાઈ-રેઝોલ્યુશન ડેશબોર્ડ કેમેરા ફીટ કરવામાં આવશે. આ કેમેરાની મદદથી હાઈવેની વિવિધ સ્થિતિનું સતત વીડિયો અને ઇમેજ રેકોર્ડિંગ થશે. આ ડેટાનું એઆઈ પાર્સ મોડેલ્સની મદદથી પ્રોસેસિંગ થશે.

આ આખી સિસ્ટમ રસ્તા પરની ૩૦થી વધુ પ્રકારની ખામીઓ ઓળખવા માટે ડિઝાઇન કરવામાં આવી છે. એ કારણે જે વાહનના ડેશકેમમાં રસ્તા પરના ખાડાખબડા રેકોર્ડ થશે તેના લોકેશન સહિતની નોંધ મેઈન સિસ્ટમમાં થઈ જશે. રસ્તા પરના ડેશકેમ ઉપરાંત લેન-માર્કિંગ, સ્ટ્રીટ લાઈટ્સ, સાઈનેજ, રસ્તાની બંને તરફની રેલિંગ વગેરેમાં કોઈ નુકસાન હોય તો તેની નોંધ પણ આપોઆપ થતી જશે.

હાઈવે પર ખોટી રીતે હોર્ડિંગ મૂકવામાં

આવ્યા હોય, કોઈ અવરોધ ઊભો કરવામાં આવ્યો હોય કે રેલિંગ તોડીને વાહનો ખોટી રીતે રસ્તા પર ચઢી શકે એવી વ્યવસ્થા કરવામાં આવી હોય, ખોટી રીતે પાર્કિંગ થયું હોય, પાણી ભરાયું હોય કે ઝાડીઝાંખરાં ઊગી નીકળ્યાં હોય એ બધું પણ ડેશકેમના ડેટામાં નોંધાતું જશે. ડેશકેમ રાત્રીના સમયે પણ કામ કરશે અને રાત્રે રોડ પરના માર્કિંગ, રિફ્લેક્ટર વગેરે બરાબર વિઝિબલ છે કે નહીં તથા જરૂરી જગ્યાઓએ પૂરતું લાઈટિંગ છે કે નહીં એ પણ ચકાસવામાં આવશે. આ બધો ડેટા સેન્ટ્રલાઈઝડ ડિજિટલ પ્લેટફોર્મમાં ફીડ થયા પછી એઆઈ અને એમએલની મદદથી તેનું એનાલિસિસ થશે અને ત્યાર પછી રિપોર્ટિંગના જે પગલાં લેવામાં આવે તેમાં કેટલો સમય લાગે છે એ પણ તપાસવામાં આવશે.

## ઘોસ્ટ હાયરીંગ ટ્રેન્ડથી નોકરીની શોધમાં છેતરાતા નહીં... ધ્યાનમાં રાખવા જેવી વિગતો

Online Job Applications: આજકાલ ઘણા જોબ સીકર્સ એક મુશ્કેલ પરિસ્થિતિમાં ફસાઈ રહ્યા છે, જ્યાં તેઓ અનેક નોકરીઓ માટે અરજી કરે છે. આ નોકરી જોવામાં તો આકર્ષક હોય છે, પરંતુ પછી કોઈ જવાબ મળતો નથી. જોકે આ એક સ્કેમ છે. જાહેર કરવામાં આવેલી તકો અને વાસ્તવિક ભરતી વચ્ચેનો આ અંતર હવે 'ઘોસ્ટ હાયરીંગ' નામથી ઓળખાય છે. કંપનીઓ ભરતી વિશે માહિતી આપે છે, પરંતુ હકીકત ઘણી અલગ હોય છે. ૨૦૨૪માં ૧૦ માંથી ૪ કંપનીઓએ ફેક્ટ જોબ લિસ્ટિંગ પોસ્ટ કરી હતી અને હાલમાં ૧૦ માંથી ૩ કંપનીઓ એવી નોકરીઓ માટે જાહેરાત કરી રહી છે

જે વાસ્તવમાં નથી. Resume Builder દ્વારા કરવામાં આવેલા સર્વેમાં આ વાત જાણવા મળી હતી.

'ઘોસ્ટ' જોબને કેવી રીતે ઓળખશો? નોકરી શોધનાર ઉમેદવાર કેવી રીતે જાણી શકે કે કોઈ જોબ પોસ્ટિંગ ખરેખર સાચી છે કે એને ફક્ત લિસ્ટિંગ પૂરતી મૂકવામાં આવી છે. That Culture Thingની ઓર્ગેનાઈઝેશનલ સાઈકોલોજિસ્ટ Gurleen Baruah આ વિશે કહે છે, 'ઘોસ્ટ જોબ્સ ખરેખર વધી રહ્યા છે. આથી જોબ સીકર્સ કેટલીક બાબતો પર ધ્યાન આપી શકે છે અને એનાથી બચી શકે છે. આ માટે સૌથી પહેલાં પોસ્ટિંગની તારીખ

તપાસવી. જો કોઈ રોલ એક મહિના કરતા વધુ સમયથી સતત પોસ્ટ થઈ રહ્યો હોય, તો શક્ય છે કે તેમાં હકીકતમાં ભરતી ન થઈ રહી હોય. તેમજ, એક જ કંપનીમાંથી સમાન પ્રકારની ઘણી જોબ્સ લાંબા સમય સુધી જોવા મળે, તો એ પણ સંકેત છે.'

આ વિશે વધુ જણાવતાં તેઓ કહે છે, 'કંપનીની ઓફિશિયલ careers પેજ પર ચકાસો. જો જોબ બોર્ડર્સ પર છે પરંતુ કંપનીની વેબસાઈટ પર નથી, તો તે શંકાસ્પદ હોઈ શકે છે. તમે LinkedIn જેવી પ્લેટફોર્મ પર HR અથવા હાયરીંગ મેનેજર સાથે સીધો સંપર્ક કરવાનો પણ પ્રયાસ કરી શકો છો. આ બધું સંપૂર્ણ ખાતરી આપતું નથી, પરંતુ એ સાચી છે કે નહીં એ સમજવામાં મદદ કરે છે.'

જોબ સીકર્સ શું ધ્યાન રાખવું જોઈએ? આજના સમયમાં અપેક્ષાઓ સતત બદલાઈ રહી છે, તેથી જાગૃત અને અનુકૂળ રહેવું ખૂબ જ જરૂરી છે. આ વિશે Gurleen કહે છે, 'આ માટે કોઈ પણ વ્યક્તિ સંપૂર્ણ રીતે એનાથી બચી શકે એવું નથી, પરંતુ જે-તે વ્યક્તિના નિયંત્રણમાં હોય છે એટલું કરી શકાય છે. નવી ટેકનોલોજી શીખવી, AI કામને કેવી રીતે બદલી રહ્યું છે તે સમજવું અને સમસ્યાનો ઉકેલ લાવવો તથા કોઈ પણ

વસ્તુને સ્વીકારવા અને શીખવા જેવી સ્કિલ્સ વિકસાવવી જરૂરી છે.'

આજે AI જેમ-જેમ આગળ વધી રહ્યું છે તેમ-તેમ નોકરી ઓછી થઈ રહી છે. મોટા ભાગના કામ હવે AI કરી રહ્યું છે ત્યારે મનુષ્યની કેટલીક ક્ષમતાઓને હવે વધુ પ્રાધાન્ય આપવામાં આવી રહ્યું છે. ખૂબ જ મુશ્કેલી ભર્યા સમયમાં નિર્ણય કેવી રીતે લેવો, સ્થિતિસ્થાપકતા અને ઇમોશનલ ઇન્ટેલિજન્સ જેવી સ્કિલ્સને વધુ મહત્વ આપવામાં આવી રહ્યું છે.

કંપનીઓ શું સુધારા કરી શકે? ઘણી કંપનીઓ આ પ્રકારની જોબ પોસ્ટ્સ કરે છે કારણ કે તેઓ ભવિષ્ય માટે ઉમેદવારોનો ડેટાબેઝ તૈયાર કરવા માંગે છે. કેટલાક કિસ્સાઓમાં, અરજીમાંથી મળતી માહિતીનો ઉપયોગ talent mapping અથવા આંતરિક હેતુઓ માટે પણ કરવામાં આવે છે. કેટલીક વખત રોકાણકારોને ગ્રોથ બતાવવા માટે પણ આવી પોસ્ટિંગ થાય છે. કંપનીઓ વધુ પારદર્શિતા દેખાડી શકે છે. પોસ્ટિંગ સમયે તેઓ નોકરીને લઈને વધુ સ્પષ્ટતા કરી શકે છે જેથી યુઝરને એ પોસ્ટ વિશે જાણકારી રહે અને તેઓ અન્ય જગ્યાએ નોકરીની શોધ ચાલુ રાખે. ઘણી વાર વ્યક્તિ આ જોબ માટે એપ્લાય કર્યું હોય

તો ઇન્ટરવ્યુ માટે રાહ જોતો હોય છે. આથી કંપની કહી શકે છે કે તેઓ ભવિષ્ય માટે ડેટા બેંગ કરી રહ્યા છે.

## વોટ્સએપના મેસેજ આપોઆપ ડિલીટ કરવા માટે આટલું કરો...

યંગ જનરેશનમાં સોશિયલ મીડિયા પ્લેટફોર્મ તરીકે સ્લેપચેટ બહુ પોપ્યુલર હોવાનું એક કારણ એ છે કે સ્લેપચેટ તેના પર શેર થયેલા મેસેજ આપોઆપ ડિલીટ થાય તેવી સગવડ આપે છે. કંઈક એ જ પ્રકારની સગવડ હવે વોટ્સએપમાં પણ આવી રહી છે. એ કારણે વોટ્સએપ પર આપણે કોઈ મેસેજ શેર કરીએ ને પછી સામેની વ્યક્તિ એ મેસેજ વાંચી લે એ પછી શું થાય એ પણ આપણે નક્કી કરી શકીશું.

આ ફીચર આમ તો બહુ સાદી રીતે કામ કરશે - આપણે તેને ઇનેબલ કરીએ એ પછી સામેની વ્યક્તિ તેને વાંચી લે એ સાથે તેને માટે કાઉન્ટાઉન શરૂ થઈ જાય છે. સામેની પાર્ટીના ફોન પર વોટ્સએપમાં આપણો મેસેજ ઓપન થઈ જાય એ પછી ૧૫ મિનિટ સુધી આ કાઉન્ટાઉન ચાલે છે. ૧૫ મિનિટ પૂરી થતાં જ મેસેજ મોકલનાર તથા

### Understanding disappearing messages on WhatsApp

KIDSLOX

મેળવનાર બંનેની ચેટમાંથી મેસેજ આપોઆપ ડિલીટ થશે. જો કોઈ કારણસર આપણે મોકલેલો મેસેજ સામેની વ્યક્તિ ઓપન કરે જ નહીં, તો તે ૨૪ કલાક સુધી ઉપલબ્ધ રહેશે અને એટલા સમયમાં સામેની વ્યક્તિ તેને ઓપન કરી

શકશે. પરંતુ આ સમયગાળો પૂરો થયા પછી મેસેજ આપોઆપ બંને છેડે ડિલીટ થઈ જશે. વોટ્સએપ પર આપણે કોઈ પણ સર્વિસના ઓટીપી, પાસવર્ડ, એડ્રેસ, વેરિફિકેશન કોડ વગેરે જેવી સંવેદનશીલ વિગતો શેર કરવી હોય ત્યારે આ સુવિધા ઉપયોગી થશે.

હાલમાં કોઈ પણ વ્યક્તિ કે ગ્રૂપ માટે મેસેજ અમુક દિવસ પછી આપોઆપ ડિલીટ થાય એવી સગવડ છે, પરંતુ અત્યારે આવા ડિસેપિયરિંગ મેસેજ માટે આપણે ૨૪ કલાક, ૭ દિવસ કે ૯૦ દિવસનો સમયગાળો સિલેક્ટ કરી શકીએ છીએ. પરંતુ આ નવી સગવડથી મેસેજ વંચાયાના ગણતરીના સમયમાં જ ડિલીટ થઈ જાય એવી સુવિધા મળશે.

વોટ્સએપમાં રીડ રિસિપ્ટ ઓફ હોય તો પણ તેના માટે આ ફીચર કામ કરશે. જોકે એ ખાસ યાદ રાખવા જેવું છે કે ૧૫ મિનિટનો સમયગાળો વોટ્સએપ પર કોઈ પણ મેસેજ ફોરવર્ડ કરવા માટે પૂરતો છે. આથી સામેની વ્યક્તિ ભરોસાપાત્ર ન હોય તો આ ફીચરનો ખરેખરો લાભ મળશે નહીં. એવું હોય તો કોઈ પણ સંવેદનશીલ વિગતો શેર ન કરવામાં જ સાર છે.

# ASUS LAUNCHES BM1AD BUSINESS PC AT RS 46,599

ASUS has announced the launch of its revolutionary ASUSPRO Series Desktop PCs – 'BM1AD'. The desktop supports Windows 8 Pro or other Windows editions. It features a 4th generation Intel Core processor, optimised user friendly BIOS experience, faster data transfer with front USB 3.0, easy sharing with ASUS WebStorage and sustainable eco-friendly solution with ASUSEPU technology. ASUS realises the importance of quality, reliability and flexibility in today's competitive environment, where productivity returns are the key benchmark for investment decisions. The ASUSPRO Business Series has been developed with your business needs in mind – whatever they are and however you prioritise them. Peter Chang, Regional Head - South Asia and Country Manager – System Business Group - ASUS India said, "We are delighted to introduce the all new ASUSPRO Series which is simple, smart PCs which are suitable for everyday tasks and a true companion for the professional world. It's our constant effort to deliver incredible at budget friendly range with utmost usability. These next generation desktops enhance efficiency at work and ensure smart performance. We are hopeful that these desktops will live up to the expectations for our existing and prospective customers."

**ASUSPRO BM1AD Desktop Smart Performance:**  
The BM1AD is empowered with the latest Intel 4th generation Core processors,

and support for up to 16GB of DDR3 memory. The upgraded computing performance is able to make your data computing faster during your daily work. Enhancing your or your company's work efficiency and saving more time for doing essential tasks. Optimised user friendly BIOS interface: Based on UEFI, ASUS Pro commercial desktops provide a user friendly BIOS interface. The simple graphic and mouse controlled interface makes changing BIOS settings much faster and easier.

**Rich I/O ports for your peripherals:** ASUS Pro commercial desktops are designed with rich I/O ports to fulfil different office needs. VGA, DVI and HDMI ports are available for connecting to your projector or monitors via analog or digital signal. Meanwhile, you can additionally acquire for serial port and parallel port if needed.

**Easy connectivity with front USB 3.0 ports:** USB 3.0 transfers data 10X faster than USB 2.0 while maintaining complete backward compatibility. BM1AD features two front USB 3.0 ports and four USB2.0 on the rear I/O; allowing you to transfer data with ultimate speed and ease.

**ASUS WebStorage:**

Up to 100GB free space: Share your pictures, music and movies with 100GB free space for one year; so that you can wirelessly share your files across multiple devices. With a keyword search, you can find the relevant files in no time. Record and upload the important meeting notes with snap shots, and then access them on any devices.

**Enhanced Security:** ASUS AI Security is a management tool that protects your data from unauthorised access and computer viruses. It restricts users' access to confidential data, including enabling or disabling external USB devices or optical drives' data writing or reading capabilities, also reduces the chances of incursions from viruses. ASUS commercial desktops come with industry standard Kensington Security Slot and padlock slot for additional asset management and security; keeping your hardware and confidential data inside well protected.

The Chassis Intrusion Alert brings up special security alerts when the case has been opened, further ensuring the safety of components and data. BM1AD also features ASUS Secure Delete. It has an easy-to-use drag and drop interface that allows the user

to delete all confidential data securely.

The Trusted Platform Module (TPM) data security offers a protected and encapsulated micro-controller security chip for safeguarding internal data structures against real world threats. This ensures that information like keys, passwords, and digital certificates remains safe from external attacks, physical theft, and other types of intrusion.

**Utmost Reliability:**

ASUS computers reflect a tradition of the finest quality, innovation and longevity. ASUS Pro Series desktops are made with the world's best motherboards and employ premium solid capacitors. High quality components provide utmost durability, improved longevity, and enhanced thermal performance.

ASUS Q-Fan technology monitors system loads and temperatures, and modifies the CPU fan speed accordingly. When the system is idle, the fan goes into low speed mode to lower noise levels to create a quiet working environment.

Surpassing international standards with strict quality control: Stringent Quality Vibration Test ensures that both the construction and internal components are able to cope. The Stringent Quality and Noise Test ensure the noise levels are reduced to 28dB. All commercial models are tested to operate in the 0-degrees C to 50-degrees C range and in even the most humid environments safely for over 70 consecutive hours. The Line Voltage and Frequency Test is undertaken for regional power

requirements. Desktops are likely to experience shocks during shipping. So ASUS performs a variety of drop tests to simulate the transport process.

**Sustainable Eco-friendly solution:** The exclusive ASUS Energy Processing Unit (EPU) is the world's first PC energy saving controller, optimising efficiency by detecting real time CPU loads and improves efficiency in different usage types to boost system stability and expand product lifespan. As a recognized highly environmental friendly company, every products ASUS made is designed to be less harmful to our environment. ASUS products are easy to reuse, recycle, and disassemble, improve product power efficiency, and enforces adherence to hazardous substance guidelines.

ENERGY STAR qualified desktop delivers substantial savings over a conventional computer. Acquiring with a high-efficient, 80+ certificated power supply, you can easily saving your energy bill with ASUS pro commercial desktop. ASUS Pro commercial desktops are EPEAT-registered. EPEAT is the comprehensive global standard for greener electronics, offering a reduced environmental impact across their lifecycles and providing lower impact to our environment. Choosing eco-friendly ASUS Pro commercial desktops means you are helping to protect the environment.

The ASUSPRO BM1AD Desktop is available for an MRP of Rs 46,599 in the Indian market.

## MICROSOFT RELEASES NEW AI MODELS THAT CAN GENERATE IMAGES, AUDIO AND TRANSCRIBE TEXT

Microsoft released three specialised artificial intelligence (AI) models on Thursday, focusing on image generation, voice generation, and speech-to-text transcription. The Redmond-based tech giant claims that these models outperform specialised models from rival companies, such as Google, OpenAI, and others. The models, MAI-Transcribe-1, MAI-Voice-1, and MAI-Image-2, are also said to focus on fast generation and competitive pricing. These are currently available via the Microsoft Foundry, and they are also being rolled out to various consumer products. Microsoft Brings Three New AI Models

In a newsroom post, the tech giant introduced the three new large language models (LLMs). All of them are currently available via Microsoft Foundry and the MAI Playground. The biggest highlight is the MAI-Transcribe-1, which the company claims delivers state-of-the-art (SOTA)

speech-to-text transcription across the 25 most used languages.

The claims are based on Microsoft's internal testing on the FLEURS benchmark. It is said to outperform Gemini 3.1 Flash and GPT-Transcribe in error rate. Additionally, the company says Foundry users will find it to be the "best price-

performance of any large cloud provider."

Coming to MAI-Voice-1, the LLM is said to generate "natural, realistic speech, rich with nuance, emotional range, and expression." The model is also said to deliver consistent speech and voice identity during long-form content generation. Inside Foundry, the model will also allow users to create a custom voice with a few seconds of audio.

Microsoft claims that this process is safe and secure. It is said to generate 60 seconds of audio in a single second. Notably, the AI model will also power Copilot Audio Expressions and Copilot Podcasts.

Finally, the MAI-Image-2 model builds on the capabilities of its predecessor and is said to deliver improved output quality at a faster speed. Microsoft revealed that the model was created in collaboration with photographers, designers, and visual storytellers, and it focuses on natural lighting, accurate textures, and clear in-image text. Notably, WPP is among the first enterprise partners to have adopted the AI model.

The model, similar to the other two, will be available via the Microsoft Foundry and the MAI Playground. Additionally, it is also rolling out to Copilot, Bing, and PowerPoint.

# DOT REPORTEDLY EXTENDS SIM BINDING MANDATE TILL THE END OF 2026

The Department of Telecommunications (DoT) is said to have extended the SIM-binding mandate till the end of the year. First announced in November 2025, the directive intends to curb digital fraud and identity misuse by ensuring that registered identities remain verifiable and linked to telecom subscriber records at all times. According to a report, social media platforms flagged implementation struggles, while smartphone makers also asked for more time to deploy the mandatory feature.

Firms Like Apple Said to Have Flagged Technical Constraints

Citing sources familiar with the matter, Moneycontrol reports that companies were individually informed about the extension of the SIM

binding mandate deadline beginning March 30. "The department has extended the timeline and informed all stakeholders," the publication quoted an anonymous source as saying. Social media and instant messaging platforms like Signal, Telegram, and WhatsApp reportedly cited implementation challenges. Popular smartphone makers and operating system providers, including Apple

and Google, had also appealed for an extended deadline. The report mentions that Apple pointed out technical constraints within the iOS system and sought more time as it worked on viable approaches.

WhatsApp's parent company, Meta, was reportedly in discussions with the DoT to settle on a technically feasible strategy. The instant messaging platform, is

already working on adding support for SIM binding in India, in compliance with the DoT's directive. The functionality was first revealed to be in development in February, with suggestions that the app would inform users that it must check that their SIM card is present in their smartphone.

However, any such feature is still in the works and is yet to be rolled out in the public version of WhatsApp.

What Is SIM Binding?

Issued by the Department of Telecommunications, it is an amendment to the Telecommunication Cyber Security (TCS) Rules, 2024. The updated framework has been notified as the Telecommunication Cyber Security (TCS) Amendment Rules, 2025. The legislation

requires that the messaging service implement a continuous SIM validation, where the user account is required to remain associated with the active SIM card that was in place at the time of registration. The DoT mandated a 90-day implementation period for service providers.

The scope of the mandate includes messaging services that come under the category of Telecommunication Identifier User Entities, or TIUEs. This includes popular messaging services like WhatsApp, Telegram, Signal, Snapchat, and Messenger.

The move is said to be in a bid to curb the growing instances of digital impersonation, financial fraud, online scams, and misuse of identity, all carried out via messaging apps.

# GOOGLE AI INBOX FEATURE WITH SMART PRIORITISATION ROLLS OUT FOR GOOGLE AI ULTRA SUBSCRIBERS IN THE US

Gmail is rolling out its AI-powered Inbox feature to select Google AI Ultra subscribers in the US, expanding on the Gemini-driven updates it introduced earlier this year. The new feature adds a dedicated AI view within Gmail that highlights priority emails, surfaces actionable tasks, and groups less urgent updates into summaries. It is said to be designed to reduce inbox clutter and help users quickly focus on what matters most, building on Google's broader push to integrate AI more deeply across its email experience.

Gmail's AI Inbox Feature

Splits Email Into Two Sections

Gmail said in an X post that it has introduced an AI-powered Inbox with smart prioritisation and personalised briefings, now rolling out in beta to Google AI

Ultra subscribers in the US. The new AI Inbox appears as a separate view alongside the traditional inbox and is designed to surface priority information, rather than requiring users to scan individual emails.

The AI Inbox feature splits emails into two sections. While suggested to-dos highlight messages that need action, such as bills, reminders, or deadlines, and show what needs to be done, topics to catch up on cover less urgent updates, grouping things like travel plans, events, and purchases into quick summaries. These appear as interactive cards that link back to the original emails. AI Inbox was first introduced to a small group of testers in January and is now rolling out in beta. It runs on Gemini 3 and processes data within what Google describes as a dedicated privacy

environment. Users can turn off AI features through Gmail settings, and the company says personal Workspace data is not used to train its AI models.

The Gmail AI Inbox rollout builds on earlier Gemini features in Gmail, like natural language search, email summaries, Help Me Write, and Suggested Replies. While some of these tools are available to all users, AI Inbox is currently limited to Google AI Ultra subscribers, priced at \$249.99 (roughly Rs. 23,400) per month in the US. Google is expected to expand availability over time as testing continues.

# GOVERNMENT MIGRATES 16.68 LAKH OFFICIAL EMAIL ACCOUNTS TO ZOHOCLOUD, SPENDS RS. 180 CRORE

The Government has migrated lakhs of official email accounts to the Zoho Cloud platform. On Wednesday, the Union Minister of State (MoS) and a key minister within the Ministry of Electronics and Information Technology (MeitY), Jitin Prasada, informed the Parliament about the migration and the associated expenditure. The move comes after the ministry announced in October 2025 that it plans to upgrade official email accounts to a cloud-based, secure, and scalable system,

ditching the existing legacy system.

Government Moves Email Accounts to Zoho Cloud  
Prasada told the Parliament, during the ongoing Budget Session, that 16.68 lakh email accounts have been successfully migrated to the Zoho Cloud platform. The total move resulted in an expenditure of Rs. 180 crore, the minister stated. At the same time, he added that the central government continues to use the National Informatics Centre's (NIC) email services, indicating the migration was only partway

done.

Notably, this is the first time the Government has opted for a private player to secure the email services for various ministries and departments. TMC MPs Rachna Banerjee, Deepak Dev Adhikari, and Mala Roy have raised queries about the financial details of the move, The Economic Times reported.

In a written response, Prasada reportedly said that the payments are linked to the actual number of email accounts that have been migrated. Zoho is said to be charging between Rs. 170

and Rs. 300 per account per month, depending on the total cloud storage required. Additionally, the minister reportedly revealed that the mailbox sizes vary between 30GB and 100GB.

Prasada also highlighted that the reason behind the migration was to ensure that email accounts associated with ministries and departments have a "robust, sovereign, and secure official email system." On the reason to select Zoho, the MoS reportedly revealed that the company was chosen as a master system integrator

(MSI) via a "transparent and competitive bidding process" conducted on the Government e-Marketplace (GeM-CPPP). The process reportedly included proof of concept evaluation step with designated government users.

Despite the wide-scale migration, the minister stated that the Government continues to rely on NIC for official communication. The migration is described as a modernisation exercise to improve security and scalability.

# I-PRO UNVEILS GENAI EDGE CAMERAS FOR REAL-TIME SECURITY

At the upcoming ISC West 2026, i-PRO Co., Ltd. plans to unveil its first line of cameras powered by generative AI, offering advanced at-the-edge capabilities.

Located at booth #26053, the company will showcase these cameras, which allow for direct natural-language interaction with live video, removing the need for cloud-based services or external servers.

This new development builds on i-PRO's earlier introduction of generative AI for forensic analysis in 2025, shifting the technology from post-event analysis to real-time operations.

The launch of these cameras represents a significant advance in i-PRO's generative AI strategy, aiming to enhance live security operations.

**X-Series Fisheye Cameras**

The introduction of the X-Series fisheye cameras signifies an expansion of generative AI usage from forensic applications to everyday security tasks, such as live event detection and real-time alerting. These cameras operate entirely on-device, eliminating the

reliance on external cloud services or analytics, thus supporting quicker responses from security personnel.

By providing immediate intelligence at the edge, these cameras assist in quicker and more informed decision-making in various security scenarios. This move towards at-the-edge generative AI simplifies operations, reduces manual setup, and speeds up response times.

**Generative AI at the edge for real-time operations**

The new fisheye cameras are designed for critical environments, offering comprehensive 360-degree coverage coupled with advanced imaging and robust cybersecurity features. Their generative AI engine is

powered by Ambarella™'s CV72 AI vision SoC, enabling on-device, real-time natural-language detection that sidesteps traditional pre-set configurations.

Operators can specify monitoring conditions in simple terms, such as "person lying down," and receive instant alerts when such conditions are met, thanks to the cameras' low-latency, simplified deployment. Gerard Figols, Chief Operating Officer at i-PRO, noted, "Free text interaction changes the way people work with video." He highlighted the added value of keeping data secure and controlled on-site.

Fast investigations with privacy-focused design

The integration of generative AI also benefits forensic investigations. Operators can perform free text searches across recorded video, significantly reducing search times. With i-PRO Active Guard using on-camera metadata, this facilitates privacy-compliant and efficient data management. The system's design helps minimise manual work and streamline operations, fostering more effective workflows.

Expanding edge intelligence AI On-Site Learning and AI Processing Relay are additional features that enhance detection capabilities and integrate AI functionalities even into non-AI cameras. This adaptability ensures the cameras suit various intricate environments.

High-performance imaging The new cameras include a 12.5MP fisheye sensor, which provides high-definition panoramic views suited for both indoor and outdoor environments. AI Noise Reduction (AI-NR) is a key feature, diminishing noise and motion blur, thereby offering clearer images in low-

light scenarios.

This improved imaging fortifies subsequent AI-based detection and metadata generation, ensuring reliable insights and detection accuracy.

Open platform with enterprise-grade security i-PRO's open architecture supports Docker containers for custom or third-party AI applications, allowing flexibility and avoiding vendor lock-in. Security features such as Secure Boot and FIPS 140-3 Level 3 compliance ensure these cameras are fit for high-security contexts.

Durable outdoor designs withstand tough conditions, suited for diverse sites from transport hubs to public venues.

**A new standard for panoramic security**

The X-series Fisheye cameras mitigate blind spots and infrastructure complexity by combining expansive coverage with edge-specific generative AI.

Organisations benefit from reduced camera counts and associated costs, while enjoying easier installation and maintenance.

## META REPORTEDLY WARNS WHATSAPP USERS ABOUT FAKE APP SPYING ON ANDROID, IPHONE USERS

Meta recently introduced new scam and fraud protection tools for the instant messaging platform WhatsApp, including a new device linkage warning system, designed to alert users if a suspected bad actor remotely attempts to take over a victim's account. However, hackers have also started using innovative ways to target users, especially with the rise in spyware adoption. On Wednesday, the Mark Zuckerberg-led tech giant issued a statement to alert users about a fake WhatsApp app, which is being used to spy on users, primarily in Italy, according to a report. The spyware reportedly targeted about 200 Android and iPhone users. Android, iPhone Users Sideloaded Fake WhatsApp Could Be at Risk

The US-based tech giant, in a statement given to Italy's Agenzia Nazionale Stampa Associata (ANSA), warned about a fake WhatsApp app, which was being used to spy on approximately 200 Android and iPhone users, especially in Italy. Meta reportedly said that the company has disconnected the affected accounts and warned the victims of the

privacy and security risks.

As per the report, the fake WhatsApp app was created by Asigint, which is part of Italy's Cantu-based Sio Spa Group. The tech giant believes that hackers at Asigint employed social engineering techniques to dupe a "limited number of users" into downloading the spyware, posing as the official version of WhatsApp. The

bad actors could have been looking to remotely gain access to the users' accounts and devices. The report added that it is planning to send a formal warning to the Sio Spa-controlled firm "to cease any malicious activity". La Repubblica reports that Meta claims that spyware does not exploit any inherent vulnerabilities within WhatsApp. Hence, the official WhatsApp app remains safe to use. The company is reportedly urging users in the EU to download the instant messaging app from vetted platforms. The company reportedly said that it is not "experiencing a breach of WhatsApp's official apps, infrastructure, or encryption". Apart from gaining access to the device, the spyware potentially gave unchecked access to a user's chats with

others, as the fake version, unlike the official WhatsApp app, does not support end-to-end encryption, which allows only devices with the encryption keys to read the correspondence between two users. Similarly, it poses a major privacy risk, as it could allow hackers to access private data and credentials on a device.

In 2024, Apple allowed users in 27 EU countries to sideload apps and third-party marketplaces, complying with the Digital Markets Act (DMA). The option to sideload apps on Android devices was already available to users globally. However, the EU, with its DMA, stated that Google and Apple command a monopoly by only offering the Play Store and App Store on Android and iOS devices, respectively.

# YOUTUBE BACKGROUND PLAYBACK FOR NON-PREMIUM USERS REPORTEDLY BLOCKED ON THIRD-PARTY BROWSERS

subscribe to the paid service with this move.

Google Blocks YouTube Background Playback on These Browsers

Citing a Google spokesperson, Android Authority reports that a recent YouTube update disabled background playback for non-Premium users. "Background playback is a feature intended to be exclusive for YouTube Premium members. While some non-Premium users may have previously been able to access this through mobile web browsers in certain scenarios, we have updated the experience to ensure consistency across all our platforms," the company told the publication.

With the latest update, the audio will now stop immediately when a non-Premium user turns the screen off, or when using other apps. As per user reports on Reddit and X, the change is affecting users on Samsung Internet, Brave and Vivaldi. When trying to access the background workaround, users are reportedly getting the "MediaOngoingActivity" notification before the media controls disappear entirely. Users claim that common fixes, such as clearing the browser cache and changing the Picture-in-Picture settings, are no longer working. The latest update appears to be Google's attempts to push free users to

paying for a subscription.

In India, pricing for the YouTube Premium plan starts at Rs. 149 per month, and it provides ad-free video and music access with support for background playback. The Family plan, which offers the same benefits for up to five additional members, costs Rs. 299 per month. The two-member plan is priced at Rs. 219 per month.

A YouTube Premium Lite subscription is also available in India for Rs. 89 per month. The Premium plan was launched in 2018, and subscribers can access the content and stream music ad-free. They can also download videos to enjoy them anytime offline.

YouTube Premium was launched in 2018, and the background playback feature has been one of the key features available for YouTube Premium subscribers since then. This functionality allows users to keep listening to a video even after minimising the browser or turning off the phone's

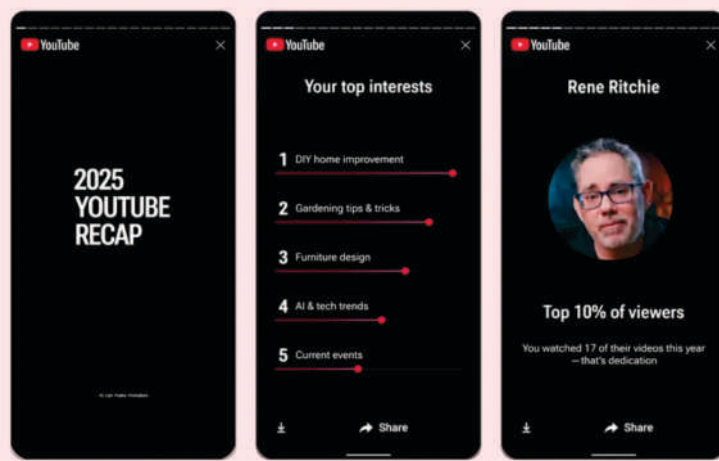

screen. Google has now reportedly clarified that this feature is blocked on third-party mobile browsers. Previously, non-premium users were able to access background playback through these browsers. The Google-owned video streaming platform could encourage more users to

# YOUTUBE RECAP 2025 ROLLED OUT WITH PERSONALISED CARDS, VIDEO VIEWING INSIGHTS

YouTube has launched its first year-end Recap for videos on the main platform, offering users a summary of their 2025 viewing habits. Until now, a user's YouTube Recap existed only within the YouTube Music app. The new rollout brings a similar retrospective experience to the main service, presenting an organised snapshot of what viewers watched most throughout the year. The feature comes at a time when year-end summaries are common across digital platforms, and YouTube's version offers users a clearer look at their interests and viewing patterns.

YouTube Recap Is the First Yearly Breakdown of Video Viewing Habits

The new YouTube Recap

uses a user's watch history to generate up to 12 cards that highlight top channels, frequently watched topics, shifts in viewing patterns, and a personality category based on content preferences, the company explained in a blog post. Personality options include the Adventurer, Skill Builder, Sunshiner, Wonder

Seeker, Connector, Dreamer, and Philosopher.

Some users will also see music-related data, such as top artists and songs. Those who have used YouTube Music for at least ten hours will be directed to a separate, detailed Music Recap within the YouTube Music app.

Recap appears on the

YouTube homepage and in the 'You' tab on both mobile and desktop. Meanwhile, Web users can also visit youtube.com/recap. The feature begins rolling out today in North America and will expand globally later this week. Mobile users need the YouTube app version 18.43 or higher. YouTube Recaps are available only for adult accounts and will remain accessible until the end of the year, the company noted. YouTube says the feature went through over 50 concept tests across nine rounds of user feedback before the final design was selected.

Alongside the rollout, YouTube released trend data for 2025. MrBeast ranked as the top creator for the sixth consecutive year, "The Joe

Rogan Experience" led the podcast charts, and Bruno Mars and Lady Gaga's "Die with a Smile" topped the song charts.

# AMAZON'S AWS INTERCONNECT PREVIEW ANNOUNCED WITH SUPPORT FOR PRIVATE LINKS BETWEEN CLOUD SERVICES

Amazon launched the preview of its new AWS Interconnect service on Monday. The new Amazon Web Service (AWS) tool is a multicloud service that will help customers establish private links between different cloud services. The preview is being rolled out in phases and is presently available in select "AWS Regions". Amazon has partnered with Google's cloud division to offer the cross-cloud connectivity solution to customers. The tech giant will onboard partners in the coming months. Moreover, in the public preview phase, customers will be able to

create a preview 1Gbps connection at no additional cost. In a blog post, the US-based tech giant announced the preview of the AWS Interconnect, a multicloud service, which is claimed to provide "high-speed private connections" to various cloud service providers. The company is initially launching the service in partnership with Google Cloud, and plans to eventually onboard more partners, like Microsoft Azure in 2026.

The AWS Interconnect tool will also fulfil customers' "interoperability requirements" when they are

migrating applications from one cloud platform to another. Additionally, it aims to eliminate complexities that arise when users are "managing global multi-layered networks at scale". However, with AWS Interconnect, they will be able to establish a private, "secure" and "high-speed" network connection, which has a dedicated bandwidth.

Customers will also be able to quickly and easily link various AWS networking services, like AWS Transit Gateway, AWS Cloud WAN, and Amazon VPC, to other cloud service providers with the

help of AWS Interconnect. The tech giant claims that this process could otherwise take weeks or months. Service providers can choose to adopt the same using the open API package on GitHub, Amazon said. The blog post added that customers can establish a preview 1Gbps connection per user at no extra cost during the public preview. Meanwhile, after being generally available, the preview connections will be removed by the tech giant from the respective accounts. The pricing for AWS Interconnect will be revealed ahead of the general rollout.
